

BERNSTEIN

CC-5000 *next* **Aluminium Control Enclosure**

Protection in its most beautiful form

The new Aluminium Control Enclosure CC-5000 next

Design aspects along with **modularity**, **functionality** and **ergonomics**, are rapidly becoming more and more important for plant and machinery manufacturers, especially when selecting the appropriate control enclosure for their machines and installations. To meet the increasing demand for aesthetically pleasing enclosures, we have developed a new BERNSTEIN Control Enclosure System.

In addition to technical optimisation, **contemporary design** and a **modular system** is of the utmost importance – all of which are included in this new product.

Product features

- Modern and functional industrial design
- High-quality extruded aluminium sections (naturally anodised)
- Customised colours from RAL range
- Single-walled sections that provide outstanding heat dissipation
- Integrated recessed grips for simple handling
- Protection class IP 65
- All-round mounting grooves for built-in components, no need for modifications
- Internally mounted front panel
- Door configurations for direct access to the interior
- Slimline design for configuring flat screen systems
- Customised solutions to your specifications (see checklists on pages 12-15)

Individual colour combination

You are even able to personalise the colour of the enclosure to your specific corporate identity.

Corner modules, front and rear panels, as well as the standard version anodised aluminium sections can all be optionally powder-coated to a wide variety of RAL colours – giving the enclosure a unique and individual touch.

- Monochrome
- Coloured end caps, anodised sections
- Coloured side handle sections and end caps
- Coloured horizontal sections and end caps
- Coloured frames

Modular system

Control Enclosure versions

The dimensions of the new control enclosure CC-5000 neXt (along with our existing series CC-3000, CC-4000 and CC-4000 SL) are freely selectable. Nine possible depths are available. The obtained **installation depths** range from **53 mm** to **334 mm**. The width and height dimensions are offered up to **1000 mm** in either direction.

Frames can be used in individual or multiple combinations.

Innovative console configurations are possible thanks to a connecting element which has been designed in line with the new design.

Front panel

- Internally-mounted front panel through clamping tie bar
- Machining for integrating IPCs or Panel-PCs, push buttons and interfaces or engravings on demand
- Screen print according to your specifications on demand

Console version

**Individual solutions
for operating
and monitoring**

System features

For console versions, the keyboard is located in a separate housing. The specially designed coupling head connects the control panel (upper part) to the keyboard console (lower part).

The keyboard console can be mounted inclined downwards by 20 or 10 degrees. In the first case, the control panel is perpendicular, whilst in the second case it is inclined backwards by 10 degrees.

Technical details

Frame design

- Use of **extruded aluminium sections** (standard naturally anodised)
- Assembling of section via **corner modules**

Hinge

- New **concealed hinge design**
- Hinge is unseen when door is closed
- **Unique** in the market today

Door centring

- Door centred via **alignment feature**
- **Invisible** in closed position
- **Secure** door closing

Rear panel

- **Fixed** version
(optional connection to panel coupling)
- **Hinged** version

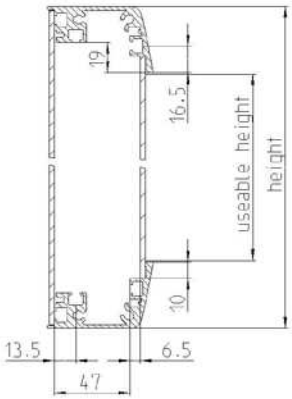

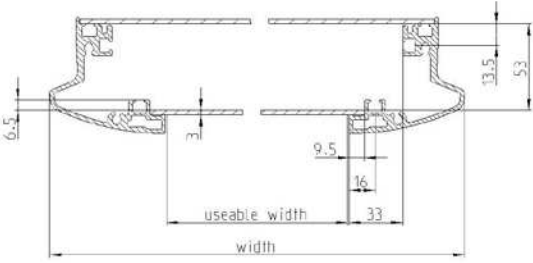

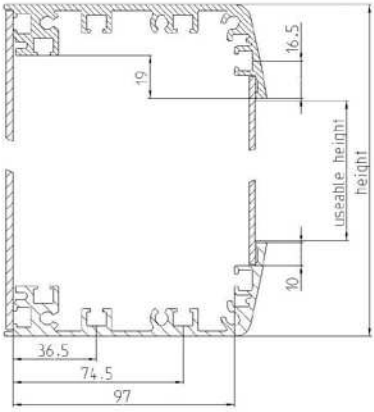

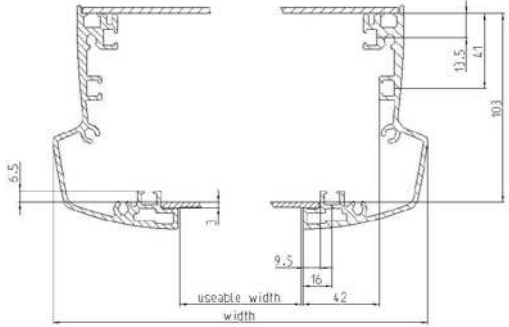

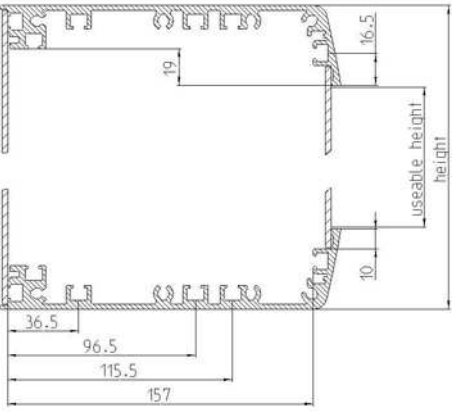

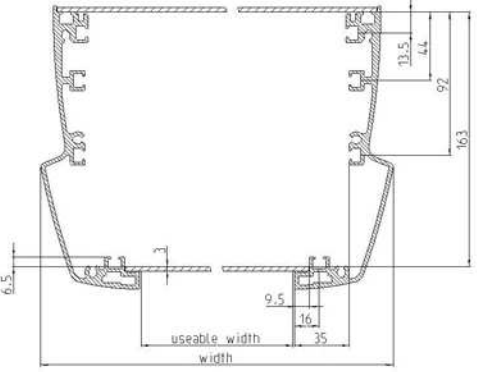

Sections and combination possibilities

To provide simple and safe handling when connecting to the suspension system, the CC-5000 neXt has integrated recessed grips on the left and right hand side. Inside there are adjustable slots to allow components such as power supply units, support panels, terminal mounting rails etc. to be easily attached.

Basis sections	External depth	Installation depth
	75 mm	53 mm
	125 mm	103 mm
	185 mm	163 mm
Section combinations	External depth	Installation depth
	150 mm (75 + 75)	114 mm
	200 mm (75 + 125 or 125 + 75)	164 mm
	250 mm (125 + 125)	214 mm
	260 mm (75 + 185 or 185 + 75)	224 mm
	310 mm (125 + 185 or 185 + 125)	274 mm
	370 mm (185 + 185)	334 mm

Technical data

Material

- Extruded sections: Aluminium
- Die-cast corners: Aluminium
- Die-cast caps: Aluminium
- Sealings between section and corner module: PUR
- Sealings for front panel and rear panel: EPDM, PUR and PVC
- Hinge (for section combinations): Aluminium
- Articulated hinge (for enclosure with single sections): Aluminium
- Front panel, rear panel: Aluminium

Colour

- Sections: Naturally anodised (standard)
- Front panel, rear panel: Naturally anodised (standard)
- Corner modules: RAL 9006, white aluminium (standard)
- All components can be optionally powder-coated to a wide variety of RAL colours

Protection class

- IP 65

Operating temperature

- -30 °C to +80 °C

Dimensions

- Width x height maximum: 1000 mm x 1000 mm
- Width x height minimum: 276 mm x 376 mm

Approvals

- cULus (projected)

Accessories

Thanks to a comprehensive range of accessories, the modular control enclosure concept can be perfectly adapted to your requirements.

**Optional accessories
for individual solutions**

- Signal light integrated in the design (RGB-LED)
- Door arrester
- Suspension system components for attaching on the top, bottom and back
- Different keyboard solutions
- Diverse add-on elements (interfaces, push buttons, fans, handles etc.)

For further control enclosure accessories, please see our main catalogue
