- Interrupting rating 200kA RMS Symmetrical. ■ 150 Vdc rating
 - Watts loss provided at rated current.
 - Note: 7LET, 10LET, 12LET and 16LET are available for replacement purposes on existing equipment.
 - All fuses above have been tested at 318 Vac.
- 1 kg = 2.2 lbs 1 lb = 0.45 kg

Dimensions

Fig. 2: LET

Dimensions in mm.
 1mm = 0.0394" 1" = 25.4mm

Electrical Characteristics

Total Clearing I²t

The total clearing I²t at rated voltage and at power factor of 15% are given in the electrical characteristics. For other voltages, the clearing I²t is found by multiplying by correction factor, K, given as a function of applied working voltage, E_g, (RMS).

1) LCT
 2) LET, LMT, LMMT

Arc Voltage

This curve gives the peak arc voltage, U_L, which may appear across the fuse during its operation as a function of the applied working voltage, E_g, (RMS) at a power factor of 15%.

1) LCT
 2) LET, LMT, LMMT

Power Losses

Watts loss at rated current is given in the electrical characteristics. The curve allows the calculation of the power losses at load currents lower than the rated current. The correction factor, K_p, is given as a function of the RMS load current, I_b, in % of the rated current.
