## VARIMETER

Undercurrent Relay
IK 9273, SK 9273

- According to IEC/EN 60255
- Single phase
- Measuring ranges from 0.05 ... 10 A
- Setting value adjustable from $0.1 \ldots 1 I_{\mathrm{N}}$
- Fixed hysteresis approx. 4 \%
- Settable switching delay
- Closed circuit operation
- Optionally open circuit operation
- Automatic reset
- Optionally manual reset, reset button on the front
- LED indication for auxiliary voltage and contact position
- 1 changeover contact
- Devices available in 2 enclosure versions:

IK 9273: depth 59 mm , with terminals at the bottom for installation systems and industrial distribution systems according to DIN 43880
SK 9273: depth 98 mm , with terminals at the top for cabinets with mounting plate and cable duct

- Width 17.5 mm

Approvals and Markings

## C $\epsilon$

## Application

Undercurrent monitoring in AC voltage power supplies

## Indication

green LED:
yellow LED:
on when auxiliary supply connected on when output contacts switched

## Function Diagram

## Notes

Auxiliary voltage and measuring circuit are not galvanically seperated. Thus they need, the same reference potential " N " if there is no external galvanic seperation, e.g. through a current transformer see Application Examples.

## Technical Data

Input
Measuring ranges:

Nominal frequency of measuring current: Maximum continuous measuring current: at AC $50 \ldots 500 \mathrm{~mA}$ : at AC $0.1 \ldots 1 \mathrm{~A}$ :
at AC $0.5 \ldots 5 \mathrm{~A}$ :
at AC 1 ... 10 A:
Max. overload:
at AC $50 \ldots 500 \mathrm{~mA}$ :
at AC $0.1 \ldots 1$ A:
at AC $0.5 \ldots 5$ A:
at AC $1 \ldots 10$ A:

## Variants

IK 9273.11/010:
IK 9273.11/100:
Open circuit operation
Manual reset, closed circuit operation
Manual reset, open circuit operation

## Ordering example for variants

## Characteristics

## Switching delay

The characteristic shows the switching delay depending on the values of $X_{a n}-X_{a b}$ when switching the current on or off. A slow current change reduces the delay.
$F=\frac{1 \text { applied }}{I \text { setting }}$

## Application Examples

$\begin{array}{ll}\mathrm{L} / \mathrm{i}-\mathrm{N} & \text { auxiliary voltage } \\ \mathrm{L} / \mathrm{i}-\mathrm{L} / \mathrm{k} & \text { current input }\end{array}$

Connection Example for IK 9273/100 + IK 9273
Load in series to the contact. When undercurrent the load is turned on. The fault is stored. New start by pressing reset button or auxiliary voltage off, on.Maximum continuous measuring current for this application is 5 A .

Connection Example with external galvanic seperation, e.g. by current transformer
Attention: On the secondary side of the current transformer is the potential L.
$\mathrm{L} / \mathrm{i}$ is allowed to be exchanged, so that the secondary side of the current transformer has the potential N .
