

# Insulated Enclosure KO 4737

with 4 high current terminal blocks for solder connection  
and 4 twin-level terminal blocks for Plug-in technology

- Width 90 mm
- High current terminal block for soldering
  - Max. 12 box terminals with captive plus-minus terminal screw
  - Electrical connection of PCB to terminal via stranded ferruled
- twin-level terminal block for plug-in technology
  - Max. 28 box terminals with captive plus-minus terminal screw
  - Twin-level terminal
  - Removable terminal blocks for connection with PCB
  - Terminal blocks with choice of 3-; 4- or 7-terminals or as blanking block
- Installation of SMD components on outer surface (soldering side) possible
- Can be used for EExi complying with EN 50 020

## Notes on Housing Opening

### 1. Tool

- for all functions use 0.8 x 4,0 or 0.8 x 4.5 screwdriver

### 2. Removing of terminal blocks and frame

- Insert a screwdriver in the side recesses of the base (underneath)
- With light pressure, turn the screwdriver to the left or right.
- The snap-in lug of the frame disengages.
- Repeat disengaging process on opposite side.
- Terminal blocks with frame can be removed.
