

# Technical Information

## RIA45

Panel meter

Panel meter with control unit for monitoring and visualizing measured values

### Application

- Plant and apparatus engineering and construction
- Control rooms and cabinets
- Laboratories
- Process recording and supervision
- Process control
- Signal adjustment and signal conversion
- Overfill protection according to WHG

### Your benefits

- 5-digit, 7-segment backlit LC display
- User-configurable dot matrix display range for bar graph, units and tag name
- 1 or 2 universal inputs
- 2 relays (optional)
- Min./max. value saved
- 1 or 2 calculated values
- One linearization table with 32 points for each calculated value
- 1 or 2 analog outputs
- Digital status output (open collector)
- Operation using 3 keys
- SIL2 approval (optional)

## Function and system design

### Application

Example for "differential pressure" application

The RIA45 panel meter powers the transmitter and processes analog signals from transmitters, particularly from the area of process instrumentation. These signals are monitored, evaluated, calculated, saved, separated, linked, converted and displayed. The signals, intermediate values and the results of calculations and analysis are transmitted by digital or analog means.

### Measuring system

The RIA45 is a process transmitter, which is controlled by a microcontroller, and exhibits a display, analog inputs for process and status signals, analog and digital outputs, as well as an interface for configuration.

Connected sensors (e.g. temperature, pressure) can be powered by the integrated transmitter power supply system. The signals to be measured are converted from analog to digital signals, processed digitally in the device, and then converted from digital to analog signals and made available to the various outputs. All measured values, and values calculated in any way, are available as a signal source for the display, all outputs, relays and the interface. It is possible to make multiple use of the signals and results (e.g. a signal source as an analog output signal and limit value for a relay).

### Mathematics functions

The following mathematics functions are available in RIA45:

- Sum
- Difference
- Multiplication
- Mean
- Linearization

#### Linearization function

Up to 32 user-definable points are available in the device per calculated value to linearize the input, e.g. for tank linearization. In the case of the two-channel device (option), mathematics channel M2 can be used to linearize mathematics channel M1.

Linearization is also available in the FieldCare configuration software.

## Input

<b>Inputs</b>	One or two universal inputs
<b>Measured variable</b>	Current, voltage, resistance, resistance thermometer, thermocouples

### Limit function

Relay contact	Changeover
Maximum contact burden DC	30 V / 3 A (permanent state, without destruction of the input)
Maximum contact burden AC	250 V / 3 A (permanent state, without destruction of the input)
Minimum contact load	500 mW (12 V/10 mA)
Galvanic isolation towards all other circuits	Test voltage 1500V AC
Switching cycles	> 1 million

# Terminal assignment

Electrical connection

Terminal assignment of panel meter (relays (terminals Rx1-Rx3) and channel 2 (terminals 21-28 and O25/O26) are optional)

<b>Supply voltage</b>	Wide-area power supply unit 24 to 230 V AC/DC (-20 % / +10 %) 50/60 Hz
<b>Power consumption</b>	Max. 21.5 VA / 6.9 W
<b>Connection data interface</b>	<p><b>Commubox FXA291 PC USB interface</b></p> <ul style="list-style-type: none"> <li>▪ Connection: 4-pin connector, rear of device</li> <li>▪ Transmission protocol: FieldCare</li> <li>▪ Transmission rate: 38,400 Baud</li> </ul> <p><b>Interface cable TXU10-AC PC USB interface</b></p> <ul style="list-style-type: none"> <li>▪ Connection: 4-pin connection</li> <li>▪ Transmission protocol: FieldCare</li> <li>▪ Delivery scope: Interface cable incl. Resolution	13 bit	
Temperature drift	0.01%/K (0.1%/18 °F) of of measuring range	
Galvanic isolation	Testing voltage of 500 V towards all other circuits	

## Installation

**Installation instructions****Mounting location**

Panel, cutout 92 x 45 mm (3.62 x 1.77 inch) (see 'Mechanical construction').  
Max. panel thickness 26 mm (1").

**Orientation**

The orientation is determined by the readability of the display.  
Max. viewing angle range +/- 45° from the central display axis in every direction.

## Environment

**Ambient temperature range**

Non-Ex/Ex devices: -20 to +60 °C (-4 to 140 °F)  
UL devices: -20 to +50 °C (-4 to 122 °F)

**Storage temperature**

-40 to +85 °C (-40 to 185 °F)

**Operating height**

< 2000 m above MSL (6561 ft)

**Climate class**

As per IEC 60654-1, Class B2

**Degree of protection**

Front IP 65 / NEMA 4 (not evaluated by UL)  
Device casing/rear side IP 20

**Condensation**

Front: permitted  
Device casing: not permitted

**Electrical safety**

Protection class I, overvoltage category II, pollution degree II

**Electromagnetic compatibility (EMC)**

- Interference immunity:  
To IEC 61326 industrial environments / NAMUR NE 21
- Interference emissions:  
To IEC 61326 Class A

## Mechanical construction

<b>Weight</b>	Approx. 300 g (10.6 oz)
<b>Material</b>	<ul style="list-style-type: none"> <li>■ Housing: plastic PC-GF10</li> </ul>
<b>Terminals</b>	Plug-in spring terminals, 2.5 mm <sup>2</sup> (14 AWG); auxiliary voltage with screw terminals (AWG 22-14; torque 0.4 Nm (3.5 lb in)).
<b>Panel thickness</b>	Max. 26 mm (1").

## Human interface

### Display elements

Display of the panel meter

- 1: Channel display: 1: analog input 1; 2: analog input 2; 1M: calculated value 1; 2M: calculated value 2  
 2: Dot matrix display for TAG, bar graph and unit  
 3: Limit value indicators in the bar graph  
 4: "Operation locked" indicator  
 5: Green LED; measuring device operational  
 6: Red LED; error/alarm  
 7: Yellow LED; status of relay 1  
 8: Yellow LED; status of relay 2  
 9: Minimum/maximum value indicator

- Display
  - 5-digit, 7-segment backlit LC display
  - Dot matrix for text/bar graph
- Display range
  - 99999 to +99999 for measured values
- Signaling
  - Setup security locking (lock)
  - Measuring range overshoot/undershoot
  - 2 x status relay (only if relay option was selected)

### Operating elements

3 keys: -, +, E

### Remote operation

#### Configuration

The device can be configured with the PC software or on site using the operating keys. FieldCare Device Setup is delivered together with the Commubox FXA291 or TXU10-AC (see 'Accessories') or can be downloaded free of charge from [www.endress.com](http://www.endress.com).

#### Interface

4-pin socket for the connection with a PC via Commubox FXA291 or TXU10-AC interface cable (see 'Accessories')

## Ordering information

Detailed ordering information is available from the following sources:

- In the Product Configurator on the Endress+Hauser website: [www.endress.com](http://www.endress.com) → Select country → Instruments → Select device → Product page function: Configure this product
- From your Endress+Hauser Sales Center: [www.endress.com/worldwide](http://www.endress.com/worldwide)

### Product Configurator - the tool for individual product configuration

- Up-to-the-minute configuration data
- Depending on the device: Direct input of measuring point-specific information such as measuring range or operating language
- Automatic verification of exclusion criteria
- Automatic creation of the order code and its breakdown in PDF or Excel output format
- Ability to order directly in the Endress+Hauser Online Shop
