Liquisys M CCM223/253

Measurement of free chlorine/chlorine dioxide/ total chlorine

Transmitter for chlorine sensors

Application

- Drinking water
- Water treatment
- Cooling water
- Gas scrubbers
- Reverse osmosis
- Food processing
- Swimming pool water

Your benefits

- Field or panel-mounted housing
- Universal application
- pH compensation for free chlorine
- Simple handling
  - Logically arranged menu structure
  - Calibration via CAL button
- Safe operation
  - Overvoltage (lightning) protection
  - Manual contact control and user-defined alarm configuration

The basic unit can be extended with:
- 2 or 4 additional contacts for use as:
  - Limit contacts (also for temperature)
  - P(ID) controller for chlorine and pH
  - Timer for simple rinse processes
  - Complete cleaning with Chemoclean
- Plus package:
  - Manual pH compensation for Cl_2
  - Any current output configuration via table
  - Automatic cleaning start
  - Process monitoring and live check of sensor
- HART or PROFIBUS PA / DP
- 2nd current output for temperature, main measured value or actuating variable
- Current input for flow rate monitoring with controller shut off or for feedforward control

Function and system design

Features of the basic version (EK)

Measurement of free chlorine, chlorine dioxide and total chlorine

The sensor is selected from the menu. The **temperature** is displayed but the reading can also be hidden. The EP version has an alternative feature that allows simultaneous display of the pH and redox measurements.

Calibration

The CCS140/141 sensors for free chlorine and the CCS240/241 sensors for chlorine dioxide are zero-current-free and therefore require only **single-point calibration**. This is carried out by entering a DPD reference measured value.
The sensor CCS120 is also calibrated by entering a DPD reference measured value. Additionally you can calibrate the zero point of the sensor CCS120 (recommended for measurements below 0.1 mg/l).

Configuration

Different alarms are required depending on application and operator. Therefore the transmitter permits independent **configuration of the alarm contact and error current** for each individual error. Unnecessary or undesirable alarms can be suppressed in this manner. **Up to four contacts Up to two contacts** can be used as limit contacts (also for temperature), to implement a P(ID) controller or for cleaning functions.
Direct **manual operation of the contacts** (bypassing the menu) provides quick access to limit, control or cleaning contacts, permitting speedy correction of deviations.
The **serial numbers** of the instrument and modules and the order code can be called up on the display.

Additional functions of the Plus package (ES)

Current output configuration

In order to output wide measuring ranges while still achieving a high resolution in specific ranges, the **current output** can be configured as required via a table. This permits **bilinear** or **quasi-logarithmic** curves, etc.

Manual pH compensation for free chlorine

Measurement of free chlorine with amperometric sensors is pH-dependent while DPD measurement used for calibration is pH-independent. **Manual pH compensation** means the instrument can also be used to measure a variable pH value with a slow rate of change.

Process Check System (PCS)

It comprises two independent safety functions:
- Errors in applications **without** control are detected by monitoring the limit beween plausible and implausible measured values, i.e. **the alarm threshold**.
- Errors in applications **with** control are detected by the **controller monitor** which monitors freely adjustable, maximum permissible time intervals and reference value overshoot or undershoot.

Live check

The live check issues an alarm when the sensor signal does not change over a defined period of time. This may be caused by blocking, passivation, separation from the process, etc.

Additional functions of version EP

Alternatively measurement of pH or ORP

This extension allows additional measurement of pH value or ORP in an instrument. It also allows control of the pH value in the process.
Automatic pH compensation means the instrument can also be used to measure a variable pH value which is subject to frequent changes.

Second current output

The second current output is freely configurable for the output of temperature, of the main measured value (free chlorine, chlorine dioxide, total chlorine) or actuating variable.

Current input

The current input of the transmitter allows two different applications: controller shut-down in case of lower flow rate violation or total failure in the main flow as well as feedforward control. Both functions are also combinable.

Measuring system

A complete measuring system comprises:

Version 1 (free chlorine and chlorine dioxide)
- The transmitter Liquisys M CCM223 or CCM253
- A membrane covered sensor CCS140/141 for Cl_2 or CCS240/241 for ClO_2 or an open sensor 963 for Cl_2
- A flow assembly CCA250 (not necessary for sensor 963)

and optional:

- A pH or ORP sensor
- An INS proximity switch for flow monitoring (omitted with 963 sensor)
- CMK extension cable for chlorine measurement if required
- CYK71 extension cable for pH/ORP measurement if required
- MK extension cable for INS proximity switch if required
- VBC junction box

Version 2 (total chlorine)
- The transmitter Liquisys M CCM223 or CCM253
- A sensor for total chlorine CCS120
- A flow assembly CCA250 or immersion assembly CYA611
- A special measuring cable CPK9, PM wire internally

and optional:

- A pH or ORP sensor
- An INS proximity switch for flow monitoring (omitted with immersion assembly)
- CMK extension cable (PM wire internally) for chlorine measurement if required
- CYK71 extension cable for pH/ORP measurement if required
- MK extension cable for INS proximity switch if required
- VBC junction box

NOTICE

**The device does not have a power switch**

▸ You must provide a protected circuit breaker in the vicinity of the device.
▸ This must be a switch or a power-circuit breaker and you must label it as the circuit breaker for the device.
▸ At the supply point, the power supply for the 24 V versions must be isolated from dangerous live cables by double or reinforced insulation.

Additional functions of the Plus package

Version ES
Compared to the basic EK version, this version is extended by the Plus package:

- Manual pH compensation for free chlorine, fields B2 and B3
- Current output table, fields O33x
- Sensor and process monitoring, function group P
- Automatic start of cleaning function, field F8.

Version EP
This version includes the functions of the ES version and in addition:

- Optional pH or ORP measurement, field B1
- Automatic pH compensation for free chlorine
- Sensor and process monitoring even for pH or ORP, fields P12x
- Limit contact for pH or ORP, fields R22x
- pH value control, fields R25x.
