

# Technical information

## Solphant M

### FTM50, FTM51, FTM52

Vibronic

#### Universal point level switch for fine-grained bulk solids

#### Application

Solphant M is a robust point level switch for silos with fine-grained or dusty bulk solids even with a low bulk weight.

The various designs mean the device has a wide range of applications.

Many certificates are available for use in dust or gas incensive hazard areas.

#### FTM50:

Compact design for installation in any position. A wide range of applications thanks to various variations e.g.

- Polished short fork with stainless steel housing (F15) and Tri-Clamp
- Coated standard fork with aluminum housing (F17) and flange
- Standard fork with 280 °C (536 °F) rating and aluminum housing (F13)

#### FTM51:

With extension pipe up to 4 m (13 ft) for installation in any position

#### FTM52:

With rope up to 20 m (66 ft) for installation from above

Typical applications:

Cereals, flour, cocoa, sugar, animal feed, detergents, dye powder, chalk, gypsum, cement, plastic granules, fly ash

#### Your benefits

- Market leader in the area of level detection of bulk solids
- Functional safety up to SIL 2 as per IEC 61508
- No mechanically moving parts: no wear, long operating life
- Insensitive to external vibrations and build-up
- Various electronic inserts: e.g. NAMUR, relay, thyristor and PFM-signal outputs for optimum alignment with the plant control system
- Configurable density setting (bulk weight setting) and switching delay
- Process temperature up to 280 °C (536 °F)
- Choice of coated or polished sensor
- Diagnostic function: warning in the event of impending device failure due to buildup or abrasion

## Function and system design

### Measuring principle

A piezoelectric drive excites the tuning fork of Soliphant M to its resonance frequency. If medium covers the tuning fork, the fork's vibrating amplitude changes (the vibration is damped). Soliphant M's electronics compare the actual amplitude with a target value and indicate whether the tuning fork is vibrating freely or whether it is covered by medium.

A: Amplitude  
t: Time

L00-FTM5xxxx-15-06-xx-xx-001

### Measuring system

The measuring system is available either with compact instrumentation or separate instrumentation with a switching unit. The following electronic versions are available:

#### Compact instrumentation

##### FEM51:

- Two-wire AC version
- Switch the load directly into the power supply circuit via the thyristor

##### FEM52:

- Three-wire DC version
- Switch the load via the transistor (PNP) and separate connection

##### FEM54:

- Universal current version with relay output
- Switch the loads via 2 floating change-over contacts (DPDT)

L00-FTM5xxxx-15-05-xx-xx-000

1 Electronic version

#### Separate instrumentation with switching unit

For connecting to a separate switching unit or isolating amplifier such as Nivotester:

- FTL325N, FTL375N (NAMUR) or
- FTL325P, FTL375P (PFM)

##### FEM55:

Signal transmission 8/16 mA along two-wire cabling:

##### FEM57:

- PFM signal transmission
- Current pulses superposed on the power supply along the two-wire cabling
- Self-test from the switching unit without changing levels

##### FEM58:

- Signal transmission H-L edge 2.2 to 4.8 / 0.4 to 1.0 mA to EN 50227 (NAMUR) along two-wire cabling
- Checking of connecting cabling and other devices by pressing a key on the electronic insert

L00-FTM5xxxx-15-05-xx-xx-en-000

1 Electronic version

2 Switching unit, PLC, isolating amplifier, segment coupler

## Cable specifications

Within the indicated standards and guidelines to interference immunity (see also "Electromagnetic compatibility", → 12) a normal instrument cable is sufficient. If higher interference levels are present, a shielded cable must be used.

### Immunity to temperature change of connecting cable

The connecting cables must withstand the ambient temperature +5 K.

---

<b>Connecting cables</b>	<ul style="list-style-type: none"> <li>▪ Electronic inserts: cross-section max. 2.5 mm<sup>2</sup> (13 AWG); strand in ferrule to DIN 46228</li> <li>▪ Protective ground in housing: cross-section max. 2.5 mm<sup>2</sup> (13 AWG)</li> <li>▪ Equipotential bonding connection on housing: cross-section max. 4 mm<sup>2</sup> (11 AWG)</li> </ul>
--------------------------	---

---

<b>Cable entry</b>	Housing-specific: screw terminal on electronic insert.
--------------------	--

## Input

---

<b>Measured variable</b>	Level (according to the mounting location and the overall length)
--------------------------	---

---

<b>Measuring range (detection range)</b>	<ul style="list-style-type: none"> <li>▪ FTM50: overall length see, → 17</li> <li>▪ FTM51: overall length 300 to 4000 mm (11.8 to 157 in)</li> <li>▪ FTM52: overall length 750 to 20000 mm (29.5 to 787 in)</li> </ul> <p>The measuring range of Soliphant M depends on the medium, mounting location and fork length. The detection range is located within the length of the fork.</p>
--	--

### Distinction between the forks:

- For light media:
  - Standard fork with a fork length of 155 mm (6.1 in) (bulk weight of the medium ≥ 10 g/l)
- For confined installation conditions, high lateral load or increased buildup:
  - Short fork with a fork length of 100 mm (3.94 in) (bulk weight of the medium ≥ 50 g/l)

---

<b>Input signal</b>	<ul style="list-style-type: none"> <li>▪ Probes covered =&gt; little to no vibrating amplitude</li> <li>▪ Probes not covered =&gt; large vibrating amplitude</li> </ul> <p>Selectable frequency monitoring (diagnosis) for detection of abrasion and build-up.</p>
---------------------	--

---

<b>Measuring frequency</b>	<ul style="list-style-type: none"> <li>▪ Standard fork: approx. 140 Hz (in air)</li> <li>▪ Short fork: approx. 350 Hz (in air)</li> </ul>
----------------------------	---

## Output

---

<b>Galvanic isolation</b>	<ul style="list-style-type: none"> <li>▪ FEM51, FEM52, FEM55: Between sensor and power supply</li> <li>▪ FEM54: Between sensor, power supply and load</li> <li>▪ FEM57, FEM58: See switching unit connected</li> </ul>
---------------------------	--

---

<b>Switch-on behavior</b>	When the power supply is switched on the switching status of the outputs corresponds to "signal on alarm". The correct switching status is assumed after a maximum of 3 s.
---------------------------	--

---

<b>Fail-safe mode</b>	<p>Minimum/maximum residual current safety selectable on electronic insert. (with FEM57 only at Nivotester).</p> <p>MAX = maximum safety: The output switches safety-oriented when the fork is covered (signal on alarm) For use with overflow prevention for example.</p> <p>MIN = minimum safety: The output switches safety-oriented when the fork is uncovered (signal on alarm) For use with dry running protection for example.</p>
-----------------------	---

**Switching delay** 0.5 s when the sensor is covered.  
 Version 150 °C (302 °F): 1.5 s when the sensor is uncovered (1.0 s for short fork)  
 Version 230/280 °C (446/536 °F): 2 s when the sensor is uncovered (1.0 s for short fork)  
 Can be changed to 5 s for covering and uncovering.

**Switch behavior** Binary

## Electronic insert

**FEM51 electronic insert (AC 2-wire)**

### Power supply

- Supply voltage AC: 19 to 253 V
- Power consumption: < 1.0 W
- Residual current consumption ( $I_R$ ): < 4 mA; 5.5 mA for short fork (in switch-off moment < 1 mA for 100 ms)
- Short-circuit protection
- Separation voltage: 3.6 kV
- FEM51 overvoltage protection: overvoltage category II

### Two-wire AC connection

Always connect in series with a load!

Check the following:

- the residual current consumption in blocked state.
- that for low voltage
  - the voltage drop across the load is such that the minimum terminal voltage at the electronic insert (19 V) when blocked is not undershot.
  - the voltage drop across the electronics when switched through is observed (up to 12 V).
- when selecting the relay, pay attention to the holding power/rated power (see "Connectable load").

\* External load "R" must be connected

\*\* AC:  $U \sim \text{max. } 253 \text{ V, } 50/60 \text{ Hz}$

L00-FTM5xxxx-04-05-xx-xx-024

### Output signal

$I_L$  = load current (switched through)

$I_R$  = residual current (blocked)

☀ = lit

⚡ = flashes

● = unlit

\* See also "Operating elements",  
 → 23

Safety mode	Level	Output signal	LEDs		
			green	yellow	red
MAX		1 $I_L$ → 2	☀	☀	●
		1 $I_R$ → 2	☀	●	●
MIN		1 $I_L$ → 2	☀	☀	●
		1 $I_R$ → 2	☀	●	●
Maintenance required *		1 $I_L / I_R$ → 2	⚡	●	⚡
Instrument failure		1 $I_R$ → 2	●	●	☀

L00-FTM5xxxx-04-05-xx-en-001

**Signal on alarm**

Output signal on power failure or in the event of device failure:  $I_R$

**Connectable load**

- For relays with a minimum holding power/rated power > 2.5 VA at 253 V (10 mA) or > 0.5 VA at 24 V (20 mA)
- For relays with a maximum holding power/rated power < 89 VA at 253 V or 8.4 VA at 24 V
- Voltage drop across FEM51 max. 12 V
- Residual current with blocked thyristor max. 4 mA (5.5 mA for short fork)
- Load current max. 350 mA (short-circuit proof)

**FEM52 electronic insert (DC PNP)**

**Power supply**

- DC voltage: 10 to 55 V
- Ripple: max. 1.7 V, 0 to 400 Hz
- Current consumption: max. 16 mA
- Power consumption: max. 0.86 W
- Reverse polarity protection/short-circuit protection
- Separation voltage: 3.6 kV
- FEM52 overvoltage protection: overvoltage category III

**Three-wire DC connection**

Preferably used with programmable logic controllers (PLC), DI modules as per EN 61131-2. Positive signal at switching output of the electronics (PNP).

DC:  $U= 10\text{ V to }55\text{ V}$

**Output signal**

$I_L$  = load current (switched through)

$I_R$  = residual current (blocked)

= lit

= flashes

= unlit

\* See also "Operating elements", → 23

Safety mode	Level	Output signal	LEDs green yellow red

Maintenance required *		$1 \text{ --- } I_L / I_R \text{ --- } 3$	
Instrument failure		$1 \text{ --- } I_R \text{ --- } 3$	

L00-FTM5xxxx-04-05-xx-en-007

**Signal on alarm**

Output signal on power failure or in the event of device failure: < 100  $\mu\text{A}$

**Connectable load**

- Load switched via transistor and separate PNP connection, max. 55 V
- Load current max. 350 mA (pulsed overload and short-circuit protection)
- Residual current < 100 µA (with transistor blocked)
- Capacitance load max. 0.5 µF at 55 V, max. 1.0 µF at 24 V
- Residual voltage < 3 V (with transistor switched through);

**FEM54 electronic insert (AC/DC with relay output)**

**Power supply**

- Alternating voltage AC: 19 to 253 V, 50/60 Hz  
DC voltage: 19 to 55 V
- Power consumption: max. 1.5 W
- Reverse polarity protection/short-circuit protection
- Separation voltage: 3.6 kV
- FEM54 overvoltage protection: overvoltage category II

**Universal current connection with relay output (DPDT)**

Note!

Please note the different voltage ranges for AC and DC.

Output:

When connecting a device with high inductance, provide a spark arrester to protect the relay contact. A fine-wire fuse (depending on the load connected) protects the relay contact on short-circuiting. The relay contacts switch simultaneously.

\* When jumpered, the relay output works with NPN logic.

\*\* See "Connectable load"

- 1 Relay outputs: normally open/closed (NO, NC)
- 2 AC: U~19 to 253 V, DC: U=19 to 55 V

L00-FTM5xxxx-04-05-xx-xx-003

**Output signal**

⏏ | = relay energized

Maintenance required *			☀ ● ☀
Instrument failure			☀ ● ☀

L00-FTM5xxxx-04-05-xx-en-008

**Signal on alarm**

Output signal on power failure or in the event of device failure: relay de-energized

**Connectable load**

- Loads switched via 2 floating change-over contacts (DPDT)
- AC: I~ max. 6 A (Ex de 4 A), U~ max. 253 V; P~ max. 1500 VA, cos φ = 1, P~ max. 750 VA, cos φ > 0.7
- DC: I= max. 6 A (Ex de 4 A) to 30 V, I= max. 0.2 A to 125 V
- The following applies when connecting a functional low-voltage circuit with double isolation as per IEC 1010: Sum of voltages of relay output and power supply max. 300 V

**FEM55 electronic insert (8/16 mA)**

**Power supply**

- DC supply voltage: 11 to 36 V
- Power consumption: < 600 mW
- Reverse polarity protection/short-circuit protection
- Separation voltage: 3.6 kV
- FEM55 overvoltage protection: overvoltage category III

**Two-wire connection for separate switching unit**

For connecting to programmable logic controllers (PLC), AI modules 4-20 mA to EN 61131-2. Output signal jump from high to low current on point level.

U= 11 to 36 e.g. PLC

L00-FTM5xxxx-04-05-xx-xx-000

		 3.6 mA			
Instrument failure		+ 2 → 3.6 mA → 1			

L00-FTM5xxxx-04-05-xx-en-006

**Signal on alarm**

Output signal on power failure or in the event of device failure: < 3.6 mA

**Connectable load**

- $R = (U - 11\text{ V}) / 16.8\text{ mA}$
- $U =$  connection DC voltage 11 V to 36 V

**FEM58 electronic insert (NAMUR H-L edge)**

Note!  
Only in combination with standard fork (fork length 155 mm (6.1 in)).

**Power supply**

- DC supply voltage: 8.2 V ±20 %
- Power consumption: < 8 mW at I < 1 mA; < 36 mW at I = 2.2 to 4.8 mA
- Separation voltage: 1.9 kV
- Connection data interface: IEC 60947-5-6

**Two-wire connection for separate switching unit**

For connecting to isolating amplifiers acc. to NAMUR (IEC 60947-5-6), z.B. FTL325N or FTL375N from Endress+Hauser.

**H-L edge:**

Output signal jump from high to low current on point level.

Additional function:

Test key on the electronic insert.  
Pressing the key breaks the connection to the isolating amplifier.

Note!

- For Ex d applications, the additional function can only be used if the housing is not exposed to an explosive atmosphere.
- Connecting to multiplexer:  
Set clock time to min. 5 s.

Isolating amplifier to IEC 60947-5-6 (NAMUR)

**Output signal**

- ☀ = lit

L00-FTM5xxxx-04-05-xx-en-012

**Signal on alarm**

Output signal  
in event of device failure: < 1.0 mA

**Connectable load**

- See "Technical Data" of the isolating amplifier connected according to IEC 60947-5-6 (NAMUR)
- Connection also to safety isolating amplifiers (I = 3 to 4.8 mA)

**FEM57 electronic insert (PFM)**

**Power supply**

- DC supply voltage: 9.5 to 12.5 V
- Power consumption: < 150 mW
- Reverse polarity protection/short-circuit protection
- Current consumption: 10 to 13 mA
- Separation voltage: 2.6 kV

**Two-wire connection for separate switching unit**

For connecting to Nivotester (see graphic) from Endress+Hauser.  
 Output signal jump of PFM from high to low frequency when sensor is covered. Switching between minimum/maximum safety on the Nivotester.

Additional function "self test":  
 After interruption of the power supply, a test cycle is activated which checks the sensor and electronics without any change in level.  
 For this purpose, the operating elements must be configured as follows:

The test is activated at the switching unit. LEDs indicate the progress of the test.

L00-FTM5xxxx-04-05-xx-xx-006

## Installation

### Installation instructions

#### Orientation FTM50

1 Protective cover (provided by the customer)

L00-FTM5xxxx-11-06-xx-xx-004

#### Orientation FTM51, FTM52

1 Sliding sleeve; 2 FTM51; 3 FTM52; 4 FTM51 with supporting tube (not included in the delivery)

A Clearance

B Maximum nozzle length: L – 145 mm (5.71 in) for short fork or L – 200 mm (7.87 in) for standard fork

L00-FTM5xxxx-11-06-xx-xx-001

## Environment

<b>Ambient temperature range</b>	-50 °C to +70 °C (-58 °F to +158 °F); With F16 housing: -40 °C to +70 °C (-40 °F to +158 °F)
<b>Storage temperature</b>	-50 °C to +85 °C (-58 °F to +185 °F)
<b>Climate class</b>	Climate protection as per DIN IEC 68, Part 2-38, Fig. 2a
<b>Degree of protection</b>	<ul style="list-style-type: none"> <li>■ Housing F15, F16, F17, separate housing: IP66/IP67, NEMA4X</li> <li>■ Housing F13, T13, F27: IP66/IP68, NEMA4X/6P</li> </ul>
<b>Vibration resistance</b>	To EN 60068-2-64: 0.01 g <sup>2</sup> /Hz
<b>Shock resistance</b>	To EN 60068-2-27: 30 g
<b>Electrical safety</b>	IEC 61010, CAN/CSA-C22.2 No. 61010-1-04 US standard UL 61010-1, 2 <sup>nd</sup> Edition
<b>Electromagnetic compatibility</b>	<ul style="list-style-type: none"> <li>■ Interference emission to EN 61326, Equipment Class B,</li> <li>■ Interference immunity to EN 61326; Annex A (Industrial) and NAMUR Recommendation NE21 (EMC).</li> </ul>

## Process

<b>Medium temperature limits</b>	<b>Non-hazardous area and Ex d + DIP certificates</b> (Ex ia certificates see Seite 35, "Certificates")
----------------------------------	--

### NOTICE

Permitted ambient temperature  $T_a$  at housing depending on the process temperature  $T_p$  in the container.

\* Restriction to -40 °C with F16 housing

\*\* Additional temperature range for sensors (FTM50, FTM51) with temperature spacer

L00-FTM5xxxx-05-05-xx-xx-003

## High temperature (only FTM50, FTM51)

\* Restriction to  $-40\text{ °C}$  with F16 housing

\*\* Additionally utilizable temperature range when using the temperature spacer outside the insulation "I"

\*\*\* Antistick coating possible up to max.  $230\text{ °C}$

2 Insulation

L00-FTM5-xxxx-05-05-xx-xx-005

## Thermal shock resistance

- Maximum 120 K
- At high temperature 260 K

## Limiting medium pressure range

-1 to 25 bar (362.5 psi)

Maximum Working Pressure (MWP)

- FTM50/51: 25 bar (362.5 psi)
- FTM52: 2 bar (29 psi) (6 bar (87 psi) for Ex d, Ex de and FM/CSA XP)

The specified range may be reduced by the selected process connection.

The pressure rating (PN) specified on the flanges refers to a reference temperature of  $20\text{ °C}$  ( $68\text{ °F}$ ), for ASME flanges to  $100\text{ °F}$ . Observe pressure-temperature dependency.

The pressure values permitted at higher temperatures can be found in the following standards:

- EN 1092-1: 2001 Tab.18

With regard to their stability-temperature property, the materials 1.4404 and 1.4435 are grouped together under 13E0 in EN 1092-1, Tab. 18. The chemical composition of the two materials can be identical.

- ASME B 16.5a - 1998 Tab. 2-2.2 F316
- ASME B 16.5a - 1998 Tab. 2.3.8 N10276
- JIS B 2220

**Burst pressure**

FTM50/51: 100 bar (1450 psi)

## State of aggregation

Solids

## Grain size

$\leq 10\text{ mm}$  (0.39 in)

## Bulk weight

Depends on the density setting on the electronic insert:

- Standard fork:  $\geq 10$  or  $50\text{ g/l}$   
(for light media)
- Short fork:  $\geq 50$  or  $200\text{ g/l}$   
(for confined installation conditions, high lateral load or increased buildup)

**Lateral load (static)**

The following graphic shows the maximum permitted lateral load  $F$  in N (lbf) in relation to the length  $L$  in mm (in).

L00-FTM5xxxx-05-05-xx-en-001

- A Short fork, sensor  $\varnothing 36$  mm (1.42 in), → 17  
 B Short fork, sensor  $\varnothing 43$  mm (1.69 in), → 17;  
 C Standard fork, sensor  $\varnothing 43$  mm (1.69 in), → 17.

**Tensile strength rope FTM52** 3000 N (lbf)

**Version with separate housing**

**Applications:**

For high ambient temperatures and applications with confined installation locations (e.g. filling nozzle applications). The cable between the separate housing and sensor can be shortened at the customer's.

A: Zone 1, Zone 21; B: Length max. 6 m (20 ft); C: Zone 0, Zone 20

	T <sub>a1</sub>	T <sub>a2</sub>	T <sub>p</sub>
FTM50/51	70 °C (158 °F)	120 °C (248 °F)	Versions: 150 °C (302 °F), 230 °C (446 °F), 280 °C (536 °F)
FTM52	70 °C (158 °F)	80 °C (176 °F)	80 °C (176 °F)

**Housing extension heights for wall and pipe mounting**

The wall holder unit forms part of the scope of supply for device versions with a separate housing.

- 1) Cover with glass insert;
- 2) - With optional temperature spacer up to 150 °C (302 °F) → 108 + 145 = 253 mm (4.25 + 5.71 = 9.96 in)  
 - With high-temperature version 230 °C (446 °F) → 108 + 175 = 283 mm (4.25 + 6.89 = 11.1 in)  
 - With high-temperature version 280 °C (536 °F) → 108 + 215 = 323 mm (4.25 + 8.46 = 12.7 in)
- 3) The bending radius is  $r \geq 100$  mm (3.94 in); with armored tube  $r \geq 75$  mm (2.95 in)

Dimen- sions mm (in)	Housing

H3	41 (1.61)		62 (2.44)		

---

**Weights** Depends on type; see last column on "Additional weight" in the ordering information

---

**Materials and surfaces** Material specifications as per AISI and DIN-EN.

**Surface roughness**

**NOTICE**

**In the area of the welding seam, the surface roughness depends on the production technique and is not defined.**

Electropolished for simple cleaning and to avoid build-up and corrosion.  
Choice of surface roughness (version => type): Ra < 0.76 µm

**Parts in contact with process**

- Process connection and extension pipe: 316L (1.4404, 1.4435)
- Tuning fork: 316L (1.4404, 1.4435)
- Flanges: 316L (1.4435 or 1.4404)
- PTFE coating: prevents buildup, FDA compliant
- ETFE coating: prevents corrosion
- FTM52: PUR/silicone for rope insulation, PBT

**Parts with no process contact**

- Seal between process connection/housing: EPDM
- Ground terminals outside on housing: 304 (1.4301), 316L (1.4404)
- Polyester housing F16: PBT-FR with PBT-FR cover or with PA12 transparent cover,
  - Cover seal: EPDM
  - Nameplate glued: polyester film (PET)
  - Pressure compensation filter: PBT-GF20
- Stainless steel housing F15: 316L (1.4404)
  - Cover seal: silicone/PTFE
  - Safety claw: 316L (1.4404)
  - Pressure compensation filter: PA, VMQ/VA
  - Nameplate labeling directly on the device
- Aluminum housing F17/F13: EN-AC-AISi10Mg, plastic-coated,
  - Cover seal: EPDM
  - Safety claw: nickel-plated brass
  - Pressure compensation filter (only F17): silicone
  - Nameplate: 304 (1.4301)
- Stainless steel housing F27: 316L (1.4435)
  - Cover seal: FVMQ (optional: EPDM seal available as spare part)
  - Safety claw: 316L (1.4435)
  - Nameplate: 316L (1.4404)
- Aluminum housing T13: EN-AC-AISi10Mg, plastic-coated,
  - Cover seal: EPDM
  - Safety claw: nickel-plated brass
  - Nameplate: 304 (1.4301)
- Cable gland versions:
  - Polyamide (PA)
  - Nickel-plated brass
  - 316L (1.4435)
  - M12 connector (nickel-plated brass)

## Operability

### Display elements

#### NOTICE

The switch settings in the following graphics are in the as-delivered state.

#### FEM51

- Green LED lit:
  - Indicates operational status
- Yellow LED lit:
  - Indicates switching status
- Red LED
  - flashing: flashes alternately with green LED if maintenance is required
  - lit: indicates device failure

L00-FTM5xxxx-03-05-xx-xx-001

#### FEM52

- Green LED lit:
  - Indicates operational status
- Yellow LED lit:
  - Indicates switching status
- Red LED
  - flashing: indicates maintenance is required
  - lit: indicates device failure

👂	<b>One switch for diagnosis</b>	
	OFF	Diagnosis of abrasion and buildup switched OFF
ON	Diagnosis of abrasion and buildup switched ON <ul style="list-style-type: none"> <li>▪ For additional density setting to high bulk density: abrasion and build-up are indicated per LED at the electronic insert only</li> <li>▪ For additional density setting to low bulk density: output of "signal on alarm" for abrasion and build-up</li> </ul>	

## Sediment detection with FTM50 and FTM51

### Detection of solids under water

Only sediment is detected.  
Water-like liquids or entrained substances are not detected.

The standard version of FTM52 is not suitable for immersion due to the IP67 rope seal!  
Version with IP68 available on request.

#### Hinweis!

Switching sensitivity decreases if a short fork is used.

L00-FTM5xxxx-19-05-xx-xx-014

## Certificates and approvals

### CE mark, Declaration of Conformity

The device is designed to meet state-of-the-art safety requirements, has been tested and left the factory in a condition in which it is safe to operate.  
The device complies with the applicable standards and regulations as listed in the EC Declaration of Conformity and thus complies with the statutory requirements of the EC directives.  
Endress+Hauser confirms the successful testing of the device by affixing to it the CE mark.

### Ex approval

FEM51, FEM52, FEM54, FEM55:

- Explosion protection for potentially explosive gas/air mixtures:  
Ex d, Ex de, XP, intrinsically safe sensor circuit Ex ia, IS
- Explosion protection for potentially explosive dust/air mixtures:  
Dust ignition-proof as per EN 50281-1-1, DIP as per EN 61241-0

FEM57, FEM58:

- Explosion protection for potentially explosive gas/air mixtures:  
Ex ia, IS (intrinsically safe power supply + intrinsically safe sensor circuit)
- Explosion protection for potentially explosive dust/air mixtures:  
Ex ia D, IS (intrinsically safe power supply + intrinsically safe sensor circuit)

See "Ordering information", → [27](#) and "Documentation", → [35](#).

Your Endress+Hauser distributor will supply you with information about hazardous area versions that are currently available.

All explosion protection data are given in a separate documentation (see "Documentation") which is available upon request.

Copies of certificates available upon request.

### Other standards and guidelines

Other standards and guidelines that were taken into consideration in designing and developing Soliphant M FTM50, FTM51, FTM52:

- Low Voltage Directive (73/23/EEC)
- DIN EN 61010 Part 1, 2001  
Protection Measures for Electrical Equipment for Measurement, Control, Regulation and Laboratory Procedures  
Part 1: General requirements
- EN 61326  
Electrical Equipment for Measurement, Control and Laboratory Use  
EMC requirements

### C-tick mark

The measuring system meets the EMC requirements of the "Australian Communications and Media Authority (ACMA)".

**CRN approval** CRN-approved devices are fitted with a separate plate bearing the registration number No.: 0F10907:5C ADD1.

**ASME B 31.3** Design and materials in accordance with ASME B31.3. The welding seams are through-penetration welded and comply with ASME Boiler and Pressure Vessel Code Section IX and EN ISO 15614-1.

**Process sealing as per ANSI/ISA 12.27.01** North American practice for the installation of process seals. Soliphant M instruments are designed by Endress+Hauser according to ANSI/ISA 12.27.01 as single seal devices with annunciation, allowing the user to waive the use and save the cost of installing external secondary process seals in the conduit as required by the process sealing sections of ANSI/NFPA 70 (NEC) and CSA 22.1 (CEC). The instruments comply with the North American installation practice and provide a very safe and cost-saving installation for pressurized applications with hazardous fluids. Please refer to the Safety Instructions (XA) of the relevant device for further information → [35ff.](#)

Product	Type	Maximum process pressure	Marking	Approval
Soliphant M	FTM50-D/F/H##...	25 bar (362.5 psi)	Single Seal	FM, CSA
	FTM51-D/F/H##...	25 bar (362.5 psi)	Single Seal	FM, CSA
	FTM52-D/F/H##...	2 bar (29 psi)	Single Seal	FM, CSA

**Other certificates**

- Material certificate as per EN 10204/3.1 for all wetted parts,
- AD2000 on request
- TSE Certificate of Suitability

The following applies to wetted device components:

- They do not contain any materials derived from animals.
- No additives or operating materials derived from animals are used in production or processing.

**Functional safety (SIL validation)** Use in safety systems requiring functional safety to SIL2 in accordance with IEC 61508. See "Documentation", → [35.](#)

## Ordering information

## Accessories

### Removing tool

For Soliphant M FTM50, FTM51, FTM52.  
Order No.: 71026213

### Weather protection cover

For Soliphant M FTM50, FTM51, FTM52  
with F13, F17 and F27 housing.  
Order No.: 71040497

L00-FTM5xxxx-03-05-xx-xx-009

### Sliding sleeve

Only for Soliphant M FTM51 with  
material version A, 2, 5 (→ 29).  
For pressurized containers.

Sliding sleeve version:

- G2  
DIN ISO 228/1  
Order No.: 52024631
- 2NPT  
ANSI B 1.20.1  
Order No.: 52024630

#### NOTICE

Suitable for switch point configuration!

mm (in)

L00-FTM5xxxx-03-05-xx-xx-002

- A G2 (316L)
- B 2NPT (316L)
- C For G2: 24 mm (0.94 in); for 2NPT: 27.5 mm (1.08 in)
- D MWP = 25 bar (362.5 psi)
- E  $T_p = \text{max. } 280^\circ\text{C } (536^\circ\text{F})$

### Rope shortening kit

Only for Soliphant M FTM52.  
Order No.: 52024632

L00-FTM5xxxx-00-00-xx-xx-001

## Spare parts

Information on the spare parts that are available for your measuring device is provided on our website "www.endress.com". Proceed as follows here:

1. Select "www.endress.com" and then select the country.
2. Click "Instruments".

3. Enter the product name into the "Product name" field.

### Endress+Hauser Produkt Suche

 A screenshot of a search form titled "Über den Produktnamen". The form has a blue header with the title. Below the header, there is a text input field with the placeholder text "Geben sie einen Produktnamen ein". To the right of the input field is a button labeled "Suche starten".

4. Select the measuring device.
5. Click the "Accessories/Spare parts" tab.

 A screenshot of the website's "Zubehör/Ersatzteile" (Accessories/Spare parts) section. At the top, there is a horizontal navigation bar with tabs: "Allgemeine Informationen", "Technische Information", "Dokumente/ Software", "Service", and "Zubehör/Ersatzteile" (which is highlighted). Below the navigation bar, there is a tree view of categories:
 

- ▶ Zubehör
  - ▼ Alle Ersatzteile
    - ▶ Gehäuse/Gehäuse Zubehör
    - ▶ Dichtung
    - ▶ Abdeckung
    - ▶ Klemmenmodul
    - ▶ HF-Modul
    - ▶ Elektronik
    - ▶ Hilfsenergie
    - ▶ Antennenmodul

 To the right of the tree view, there is an overview drawing of a measuring device with various components labeled with numbers. Below the tree view, there is a "Hinweis" (Note) section with a warning icon and text: "Hier finden Sie eine Liste mit allem verfügbaren Zubehör und Ersatzteilen. Um sich Zubehör und Ersatzteile spezifisch zu Ihrem Produkt(en) anzeigen zu lassen, kontaktieren Sie uns bitte und fragen nach unserem Life Cycle Management Service." At the bottom right of the section, there is a pagination control showing "1 / 2" and a search icon.

6. Select the spare parts (also use the overview drawings on the right-hand side of the screen).  
When ordering a spare part, always indicate the serial number that is indicated on the nameplate.  
Where necessary, replacement instructions are provided with the spare parts.

## Documentation

### NOTICE

You can find the following supplementary documentation on our product pages at [www.endress.com](http://www.endress.com).

---

#### Operating Instructions

- Soliphant M FTM50, FTM51: KA00229F
  - Soliphant M FTM52: KA00230F
  - Soliphant M FTM51, sliding sleeve, pressurized: KA00239F
  - Soliphant M FTM52, rope shortening: KA00231F
  - Soliphant M FTM50, FTM51, FTM52:
    - Separate housing; installation and shortening instructions (housing side): KA00264F
    - Separate housing and armored tube; installation and shortening instructions (housing side): KA00265F
    - Separate housing; removing and installing the sensor: KA00273F
- 

#### Certificates
