

EE451

Wall Mounted Temperature Sensor for Indoor and Outdoor

E+E sensors EE451 are used for temperature measurement in heating, ventilation and air conditioning systems enabling weather-dependent temperature regulation. In addition to active outputs 0-10 V or 4-20 mA various types of sensing elements such as Pt1000, NTC10k or Ni1000 are available for passive temperature measurement. The innovative enclosure concept (IP65) with a mounting bracket allows for easy installation and unbiased detection of ambient temperature. The optional adapter EE-PCA and the free configuration software EE-PCS facilitate the adjustment and setup of the active temperature sensors.

Features

- External mounting holes**
- » Mounting with closed cover
 - » Protection against construction site pollution
- Bayonet screws**
- » Open/closed with a ¼ rotation

- Mounting bracket**
- » Distance to wall for correct measurement of ambient temperature
