### Diffuse reflection light scanner with background suppression

5 ... 200 mm 100 mm with black-white error < 10%

- Diffuse reflection light scanner with visible red light and adjustable background suppression
- 316L stainless steel housing in Hygiene-Design
- Enclosed optics design prevents bacterial carry-overs
- ECOLAB and CleanProof+ tested
- Paperless device identification
- Scratch resistant and non-diffusive plastic front cover
- Exact scanning range adjustment through 8-turn potentiometer
- Very good black/white behavior and reliable switching, even on glossy objects and objects with colored structure
- Small, homogeneous light spot for detecting small parts
- A<sup>2</sup>LS- Active Ambient Light Suppression
- Push-pull switching outputs
- High switching frequency for detection of fast events

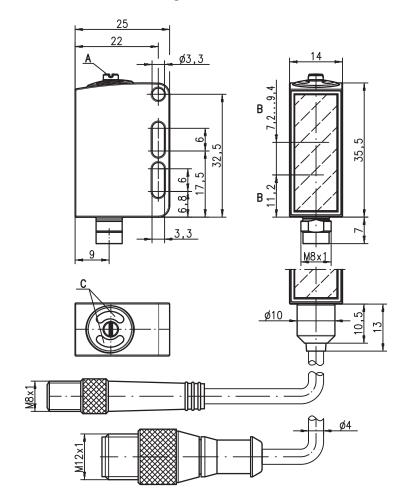

### **Accessories:**

#### (available separately)

- Cable with M8 or M12 connector (K-D ...)
- Cable for food and beverages
- Mounting devices

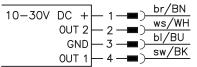

## **Dimensioned drawing**

- A Adjustment screw
- **B** Optical axis
- C Indicator diodes

### **Electrical connection**

#### Plug connection, 4-pin (with/without cable)

#### Connector, 3-pin

(see Remarks)

1) Typ. scan. range limit: max. achievable scanning range for light objects (white 90%)

Scanning range: recommended scanning range for objects with different diffuse reflection

Average life expectancy 100,000h at an ambient temperature of 25°C For UL applications: for use in class 2 circuits according to NEC only The push-pull switching outputs must not be connected in parallel

Typical value for the stainless steel housing

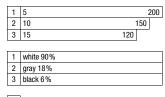

Operating temperatures of +70°C permissible only briefly (≤ 15min)

2=polarity reversal protection, 3=short circuit protection for all transistor outputs

Rating voltage 50V

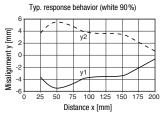

10)Only in combination with M12 connector

gray 18%

#### Remarks

A list of tested chemicals can be found in the first part of the product description.

#### Approved purpose

The light scanners are optical electronic sensors for optical, contactless detection of objects.

This product may only be used by qualified personnel and must only be used for the approved purpose. This sensor is not a safety sensor and is not to be used for the protection of persons.

	yellow LED: switching output		•	•	•	•

### **Application notes**

- For glossy surfaces (e.g. metals), the light beam should not be incident on the object surface at a right angle. A slight inclination is sufficient for preventing undesired direct reflections. This may result in a reduction in the scanning range.
- Objects should only be moved in laterally from the right or left. Moving in objects from the connector side or operating side is to be avoided.
- Outside of the scanning range, the sensor operates as an energetic diffuse reflection light scanner. Light objects can still be
  reliably detected up to the scanning range limit.
- The sensors are equipped with effective measures for the maximum avoidance of mutual interference should they be mounted opposite one another. Opposite mounting of multiple sensors of the same type should, however, absolutely be avoided.
