### Throughbeam photoelectric sensors

### **Dimensioned drawing**

- Throughbeam photoelectric sensor with • visible red light
- 316L stainless steel housing in HYGIENE-• Design
- Enclosed optics design prevents bacterial carry-overs
- ECOLAB and CleanProof+ tested
- Paperless device identification
- Scratch resistant and non-diffusive plastic front cover
- A<sup>2</sup>LS Active Ambient Light Suppression •
- High switching frequency for detection of fast events

### Accessories:

(available separately)

We reserve the right to

- Cable with M8 or M12 connector (K-D ...)
- Cable for food and beverages
- Mounting devices

- Optical axis Α
- Permissible clamping range в
- Indicator diode С

#### **Specifications Optical data** Typ. operating range limit 1) Operating range 2) Light source 3 Wavelength Timing Switching frequency Response time 0.5ms Delay before start-up Electrical data Operating voltage U<sub>B</sub><sup>4)</sup> Residual ripple Open-circuit current .../665) Switching output .../6 5) Function characteristics Signal voltage high/low Output current Operating range Indicators Green LED Yellow LED readv Flashing yellow LED Mechanical data Housing Housing design Housing roughness <sup>6)</sup> Connector Optics cover Operation 50g Weight Connection type Fastening Max. tightening torque **Environmental data** Ambient temp. (operation/storage) 7) Protective circuit <sup>8)</sup> 2, 3 VDE safety class 9) ΠÌ Protection class Environmentally tested acc. to LED class Standards applied Certifications Chemical resistance Options Activation input Transmitter active/not active $\geq 8V/\leq 2V$ Activation/disable delay ≤1ms Input resistance

Typ. operating range limit: max. attainable range without performance reserve

2) Operating range: recommended range with performance reserve

Average life expectancy 100,000h at an ambient temperature of 25°C 3)

For UL applications: for use in class 2 circuits according to NEC only 4) The push-pull switching outputs must not be connected in parallel 5)

Typical value for the stainless steel housing 6)

Operating temperatures of +70°C permissible only briefly (≤ 15min) 7) 8 2=polarity reversal protection, 3=short-circuit protection for all transistor outputs

Rating voltage 50V 9)

10)Only with internal tube mounting of the M8 connector

0...10m 0.05 ... 8.5m LED (modulated light) 620nm (visible red light) 1,000 Hz (see order guide)

≤ 300 ms

10 ... 30VDC (incl. residual ripple)  $\leq$  15 % of  $U_B$ ≤ 14mA (per sensor) 2 push-pull switching outputs pin 2: PNP dark switching, NPN light switching pin 4: PNP light switching, NPN dark switching 1 push-pull switching output pin 4: PNP light switching, NPN dark switching light/dark switching  $\geq$  (U<sub>B</sub>-2V)/ $\leq$  2V max. 100 mA fixed setting

light path free light path free, no performance reserve

AISI 316L stainless steel, DIN X2CrNiMo17132, W.No1.4404 HYGIENE-Design Ra ≤ 2.5 AISI 316L stainless steel, DIN X2CrNiMo17132, W.No1.4404 coated plastic (PMMA), scratch resistant and non-diffusive plastic (TPV - PE), non-diffusive M8 connector, 4-pin or 3-pin via fit (see "Remarks") 3 Nm (permissible range, see dimensioned drawing)

-30°C ... +70°C/-30°C ... +70°C IP 67, IP 69K10) ECOLAB, CleanProof+, EHEDG 1 (acc. to EN 60825-1) IEC 60947-5-2 UI 508<sup>4)</sup> tested in accordance with ECOLAB and CleanProof+ (see remarks)

30kΩ

#### A light axis consists of a transmitter and a receiver with the following designations:

Complete light axis LSR I SSR = Transmitter LSER = Receiver

A list of tested chemicals can be found in the first part of the product description.

Only secure in designated area using set screw. Max. tightening torque 3Nm.

#### Approved purpose:

The throughbeam photoelectric sensors are optical electronic sensors for optical, contactless detection of objects.

This product may only be used by qualified personnel and must only be used for the approved purpose. This sensor is not a safety sensor and is not to be used for the protection of persons.
