

Position Transducer with actuating rod potentiometric up to 300 mm, IP54

Series TEX

Special features

- outstanding linearity up to ±0.05 %
- resolution better than 0.01 mm
- very long life up to 100 million movements (application dependent)
- compact dimensions
- protection class IP54
- threaded shaft allows customer-defined mechanical interfaces
- cable or connector versions available
- for IP67 version, see TX2 data sheet

This cost effective transducer is characterized by its various mounting options and compact dimensions. Flexible mounting clamps or central mounting allow easy mounting under various conditions.

Typical applications are linear position measurements for process control and display, and the test lab environment.

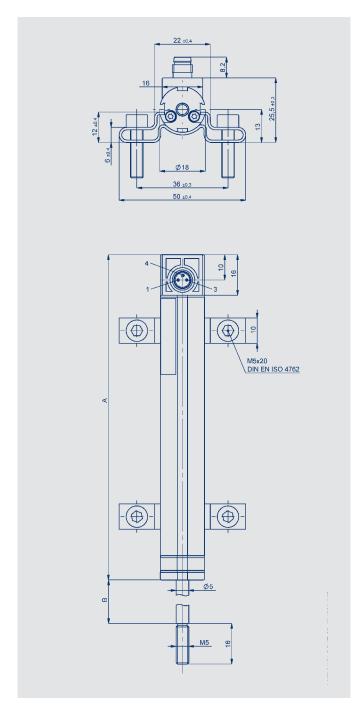

The use of a ball coupling is recommended for a side load-free guidance.

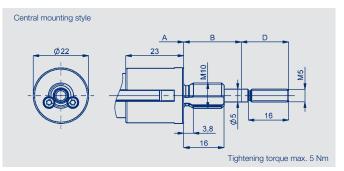

The electrical connection is provided by an M8 connector or a cable, which exits either radially or axially from the housing.

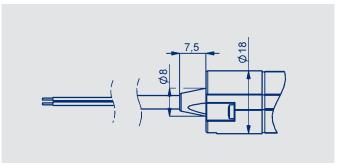

TEX transducers with return springs and pivot head mountings are shown on separate data sheets.

Mounting instructions

A ball coupling is recommended for backlash-free and side load-free operation to compensate parallel or angular errors between transducer axis and the direction of movement.

Important

All values specified in this data sheet for linearity, lifetime and temperature coefficient are only valid for a sensor used as a voltage divider with virtually no load applied to the wiper (≤ 1 μA).
