Input module Input/output modules

addressable (FDnet/C-NET)

- Input module FDCI222 with 4 monitored contact inputs for the acknowledgement of technical states or alarm actuation
- Input/output module FDCIO222 with 4 control outputs with potential-free relay contacts for the control of fire doors, ventilation, air conditioning, elevator control installations and 4 monitored contact inputs for acknowledgement or alarm actuation
- Input/output module FDCIO224 with 4 control outputs with potential-free relay contacts for the control for VdS interface of an extinguishing activating device and 4 monitored contact inputs for acknowledgement (status messages)
- Microprocessor-controlled signal evaluation
- LED display of input and output status, fault, test, etc.
- Two-wire installation for all types of cable
- Power supply via FDnet/C-NET
- Communication via FDnet/C-NET (individual addressing)
- Applicable in dry, dusty and humid areas
- Different mounting possibilities

Characteristics

- **Environmental**

- ecologically processing
- recyclable materials
- electronic und synthetic material simple separable

- **Characteristics**

- transparent housing for good visibility of the indicators
- protected electronics
- integrated line separator
- temporal status monitoring
- no auxiliary power supply required
- easy installation with spring-loaded catch
- applicable in dry areas
- use auxiliary housing for application in dust and humid/wet areas

FDCI222 Input module

- **Function**

- 4 inputs for potential-free contacts
- Input lines are monitored for open line and short circuit (termination resistors).
- Inputs can be independently configured via the fire control panel for status or alarm messages.
- status indication by LED

- **Application**

- For the connection of 4 independent, potential-free make or break contacts for the message of technical states (e.g. door or ventilation control) or for alarm actuation (e.g. sprinkler alarm).

FDCIO222, FDCIO224 Input/output modules

- **Function**

- 4 inputs for potential-free contacts
- Input lines are monitored for open line and short circuit (termination resistors).
- Inputs can be independently configured via the fire control panel for status or alarm messages.
- 4 outputs with 4 potential-free relay contacts (AC 230 V / 4 A) for fire control installations (FDCIO222), for the VdS interface for extinguishing controls (FDCIO224)
- status indication by LED

● **Application**

- FDCIO222 for the connection of 4 independent, potential-free make or break contacts for the message of technical states (e. g. door or ventilation control) or for alarm actuation (e.g. sprinkler alarm).
- For the decentralized control of fire doors, ventilation, air conditioning, etc.
- FDCIO224 for the VdS interface for extinguishing activating devices

Installation

- screw directly onto plane surface area
- mounting (series mounting) top hat rail TS35
- surface- or recess-mounted cable ducts
- in housing FDCH221 with cover, seal and screws

Installation directly in switching cabinet / control unit

Installation in range with enclosed mounting feeds at top U rail TS35

Mounting in separate housing FDCH221

For shielding cables use connection terminals DBZ1190-AB
