TTK50-HXJ0K02

 Model Name
 > TTK50-HXJ0K02

 Part No.
 > 1057791

At a glance

- · Absolute, non-contact, wear-free length measurement system for linear motors
- · Measured lengths of up to 1 m
- · Suitable for high traverse speeds of up to 10 m/s
- Reliable location positioning even in the event of condensation and contamination
 of the magnetic tape
- · Electronic type label and programming of the position value
- · Absolute location positioning, no reference run
- HIPERFACE® interface
- Conforms to RoHs

Your benefits

- · Reference traverse no longer necessary due to absolute measuring system
- · Maintenance-free thanks to non-contact measuring principle
- · Simple integration of the system due to the HIPERFACE® interface
- · Developed specifically for use in linear direct drives
- · Also for use in rough ambient conditions

Working temperature range:	-30 °C 80 °C
Storage temperature range:	-40 °C 85 °C, without package
Relative humidity/Condensation:	100 %, Condensation allowed
Resistance to shocks:	30 g, 6 ms (EN 60068-2-27)

EMC:	(EN 61000-6-2) ₁₎ (EN 61000-6-3)
Enclosure rating:	IP 65 (according to IEC 60529)
Temperature coefficient magnetic tape:	(11 ± 1) μm/K/m
Maximum permitted ambient field strength:	< 3 kA/m 4 kA/m (3.8 mgT 5 mT) (to guarantee compliance with the quoted accuracy values)
Maximum permitted field strength:	< 150 kA/m (< 190 mT) (to ensure that the magnetic tape is not permanently damaged)

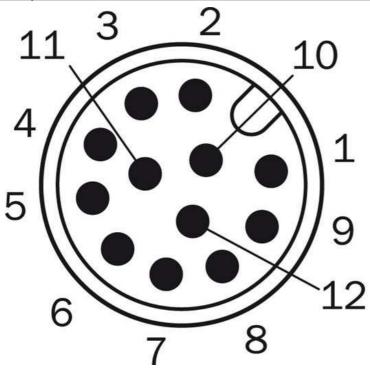

¹⁾ The EMC according to the standards quoted is achieved when the motor feedback system which is connected to the central earthing point of the motor controller via a cable screen. Users must perform their own tests when other screen designs are used. ²⁾ The maximum permitted external field influence is reached when the position value deviates from the original value (without external field influence) by more than 5 μ m. This value is reached when, at the sensor location, a field strength of 3 kA/m to 4 kA/m (3.8 mT to 5 mT) occurs in addition to the field strength of the magnetic tape.
