## TLM SERIES

The Watlow TLM series is a compact, cost-effective solution for multi-channel, redundant temperature monitoring. Each TLM has eight channels to continuously monitor thermocouples, RTDs, or thermal switches, making it ideal for multi-zone applications. Choose an individual temperature limit for each channel from the standard list or consult the factory for other limits.

The TLM is equipped with flexible interlocks, which are designed to interface with redundant controls. The alarms latch and require operator intervention to clear for process and equipment protection. Semiconductor capital equipment OEMs will find these features ideal for meeting SEMI S2 safety guidelines.

The TLM is compact and easy to install on a panel or a DIN-rail. No cutout is required, reducing installation and fabrication costs. Troubleshooting is simplified through a self-test diagnostics input, which simulates the alarm state. The TLM-8 is FM approved as a temperature limit switch, bears the CE mark (LVD and EMC Directives) and is UL® and C-UL® listed.

### Features and Benefits

#### Multi-channel monitoring

- Eight channels in one package make the TLM ideal for multi-zone applications

#### Multiple sensor types

- TLM accepts six thermocouple types, RTDs and thermal switches (one sensor type per TLM unit)

#### Selectable alarm limits

- TLM-8 can be ordered with a different temperature limit on each channel

#### Compact, easy-to-install, sub-panel mounting

- Reduces installation time

#### Flexible interlocks

- Interfaces with redundant controls; ideal for SEMI S2 applications

#### Self-test diagnostics

- Simplifies troubleshooting

#### Latching alarms

- Protects process and equipment

#### CE, UL®, C-UL® and Factory Mutual (FM) Approvals

- Global acceptance for safety and EMC compliance

### Typical Applications

- Any process requiring multi-channel redundant temperature monitoring
