

Quick Start Guide
PXU cameras (USB3 Vision™)

Latest software version and technical documentation available at:

www.baumer.com/vision/login

Product Specification

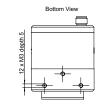

PX series - Brilliant image quality

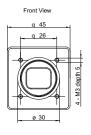

- Up to 12 megapixel and 25 fps
- Quad-tap CCD sensors
- Very high dynamic range
- · Simplified integration with USB 3 Vision

| Camera Type | Sensor Size | Resolution | Full Frames [max. fps] |
|-------------|----------------|-------------|---------------------------|
| Monochrome | | | |
| PXU-60M.Q | 1" | 2752 x 2200 | 25 |
| PXU-120M.Q | 1" | 4248 x 2832 | 13 |

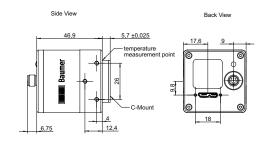

Notice

You can operate the camera to USB 2.0 port. However, the frame rate will be less than on a USB 3.0 port.

Dimensions

Safety

See the User's Guide for the complete safety instructions!

Safety Precautions

- Protect the sensor from dirt and moisture.
- Do not allow the camera to become contaminated with foreign objects.

Environmental Requirements

Storage temp. -10°C ... +70°C
Operating temp. see Heat Transmission
Humidity 10 % ... 90 %
Non-condensing

System Requirements

| | Single-camera system | Multi-camera system |
|-------------|--|-----------------------------------|
| | Recommended | Recommended |
| CPU | Intel(R) Core(TM) i5-2520M | Intel(R) Core(TM) i7-3770 CPU |
| | CPU @ 2.50GHz, Cores: 4 | @ 3.40GHz, Cores: 8 |
| RAM | 4 GB | 8 GB |
| Operating | Microsoft® Windows® 7 32 / 64 bit systems (required for USB 3.0) | |
| system (OS) | Microsoft® Windows® 8 32 / 64 b | it systems (required for USB 3.0) |

Installation

Lens mount

Notice

Ensure the sensor and lens are not contaminated with dust and airborne particles when mounting the support or the lens to the device!

The following points are very important:

- Install the camera in an environment that is as dust free as possible!
- · Keep the dust cover (bag) on the camera for as long as possible!
- Hold the printer with the sensor downwards if the sensor is uncovered.
- · Avoid contact with any of the camera's optical surfaces!

All PXU cameras comply with the recommendation of the European Union concerning RoHS Rules.

We declare, under our sole responsibility, that the previ-

ously described Baumer PXU cameras conform with the

Further Information

directives of the CE.

RoHS

General Description

| No. | Description | No. | Description |
|-----|--------------------------|-----|--------------|
| 1 | Lens mount (C-Mount) | 4 | USB 3.0 port |
| 2 | LED | | |
| 3 | Power supply / Digial IO | | |

Notice

The USB 3.0 port is only used for data transfer. The power is supplied via the Power / Digital IO port.

You can operate the camera to USB 2.0 port. However, the frame rate will be less than on a USB 3.0 port.

Data Interface / Digital IOs

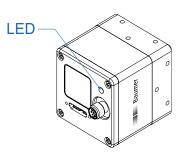

USB 3.0 Micro B 678910 **VBUS** MicB SSTX-2 D-MicB_SSTX+ D+ GND_DRAIN ID MicB SSRX-**GND** 10 MicB SSRX+

Power / Digital IOs (M8 / 8 pins / wire colors of the connecting cable) _ 5

| | | 7 | 3 | | |
|---|------------|--------|---|--------------|------|
| 1 | OUT 3 | white | 5 | IO Power VCC | grey |
| 2 | Power VCC+ | brown | 6 | OUT 1 | pink |
| 3 | IN 1 | green | 7 | Power GND | blue |
| 4 | IO GND | yellow | 8 | OUT 2 | red |

| Power Supply | | |
|-------------------|-----------------------|--|
| Power VCC | 12 V DC 24 V DC ± 20% | |
| 1 | 210 mA 420 mA | |
| Power consumption | approx. 5 W (25 fps) | |
| Fower consumption | approx. 5 vv (25 lps) | |

LED signals

| | Signal | Meaning |
|-----|-------------|--------------------|
| | green flash | Power on |
| | green | USB 3.0 connection |
| LED | red | USB 2.0 connection |
| | yellow | Data transfer |
| | red flash | Update |

Installation

Installing the camera:

- · Connect the camera to the USB connection on your PC using an appropriate cable.
- Connect the camera to power supply
- If required, connect a trigger and / or flash to the digital IOs.

Installation example 1 - PCI USB board

- 2 USB cable
- 3 Cable for trigger, flash and power

Heat Transmission

Caution

Heat can damage the camera. Heat must be dissipated adequately to ensure that the temperatures do not exceed the values in the table below.

specific method for proper heat dissipation. As there are numerous possibilities for installation, Baumer do not specifiy a specific method for proper heat dissipation, but suggest the following principles:

- operate the cameras only in mounted condition
- mounting in combination with forced convection may provide proper heat dissipation

| Measurement Point | Maximum Temperature |
|-------------------|---------------------|
| Т | 70°C (122°F) |

Troubleshooting

- 1. Check camera operation using the LED signals.
- → If LED is red:
 - · Camera is connected to USB 2.0.
- → If LED is green:
 - Check if camera is being used by another application.
 - Otherwise reconnect camera / restart software.
- 2. Check connection using Windows Device Manager:
- → If device is not listed:
 - Check the host controller power supply.
 - · Check USB 3.0 cable and connection.
- \rightarrow If device is regularly not listed
 - · Check USB 3.0 driver installation.
