

Date: August 26, 2016
To: UL low voltage Class T fuse customers
Subject: JIN and JIS product change notice

In our continuous effort to improve our products, we have completed the process of changing over to nickel plating the terminals on all the standard constructions of the Bussmann series 300V JIN 1 to 60 amp and 600V JIS 1 to 60 amp fuses. This change to the terminal plating increases their resistance to common sources of corrosion. The plating on all optional terminations that are affixed to these fuses will remain silver to maintain continuity with any manufacturing processes already used by customers.

This change does not alter the catalog numbers, ratings, agency information or product labeling. It also has no impact on the form, fit, electrical properties or function of the fuses.

All existing inventory of these fuses is saleable product and should not be returned.

Below is a listing of all the catalog numbers that are affected by this change:

JIN-1	JIN-30L	JIN-50	JIS-1	JIS-20	JIS-40
JIN-2	JIN-35	JIN-50L	JIS-1LS	JIS-25	JIS-45
JIN-3	JIN-35L	JIN-50V	JIS-2	JIS-25LS	JIS-50
JIN-6	JIN-40	JIN-60	JIS-3	JIS-25V	JIS-60
JIN-10	JIN-40L	JIN-60L	JIS-6	JIS-30	
JIN-15	JIN-40LS	JIN-60LS	JIS-10	JIS-30LS	
JIN-20	JIN-45	JIN-60V	JIS-10LS	JIS-30V	
JIN-25	JIN-45L		JIS-15	JIS-30V40	
JIN-30	JIN-45V		JIS-15LS	JIS-35	

Thank you for your support of Bussmann series circuit protection products. Should you have any questions regarding this product change notice, please contact your local Bussmann series product representative.

Best Regards,

Kevin Calzada
