

**KRTM 3B**

**Multicolor contrast scanner**

en 07-2014/05 50110625-04

**Dimensioned drawing**

- A Green indicator diode
- B Yellow indicator diode
- C Light spot orientation horizontal
- D Light spot orientation vertical
- E Transmitter
- F Receiver
- G Optical axis
- H Teach button
- J Mounting sleeve

**14.5mm**

10 - 30 V  
DC

**IO-Link**

- RGB transmitter
- Various teach variants
- Short response time
- Switching threshold adjustment via EasyTune
- Level adaptation for glossy objects
- Keyboard lockout
- Remote teach via cable
- 20ms pulse stretching

**Electrical connection**

Plug connection, 4-pin

We reserve the right to make changes • DS\_KRTM3B\_en\_50110625\_04.fm

**Accessories:**

(available separately)

- Mounting systems (BT 3...)
- Cable with M8 or M12 connector (K-D ...)

## Specifications

### Optical data

Scanning range <sup>1)</sup>		14.5mm ± 2mm
Light spot dimensions	in RUN-Mode	1.5mm x 4mm (at a distance of 14.5mm)
	in Teach-Mode	1.5mm x 6.5mm (at a distance of 14.5mm)
Light spot orientation		vertical or horizontal (see dimensioned drawing)
Light source <sup>2)</sup>		LEDs (red, green, blue)
Wavelength		640nm, 525nm, 470nm

### Sensor operating modes

IO-Link	COM2 (38.4kBAud)
SIO	standard push-pull
Dual Core	no

### Timing of the sensor

Internal switching frequency	10kHz
Internal response time	50µs
Response jitter, internal	20µs
Repeatability <sup>3)</sup>	0.02mm
Delay before start-up	≤ 300ms
Conveyor speed during teach	≤ 0.1m/s for a mark width of 1mm
Teach process	static 1-point, static 2-point or dynamic 2-point
Teach delay	≤ 10ms

### Timing of the outputs

Response time	pin 4	IO-Link COM2: acc. to IO-Link specification (typically 2.5ms)
		SIO: 50µs

### Electrical data

Operating voltage $U_B$ <sup>4)</sup>	with SIO	10 ... 30VDC (incl. residual ripple)
	with COM2	18 ... 30VDC (incl. residual ripple)
Residual ripple		≤ 15% of $U_B$
Output/function	.../2...	pin 4: GND if mark detected
	.../4...	pin 4: $U_B$ if mark detected
	.../6.0001...	pin 4 without IO-Link:
	.../6.1121...	PNP: $U_B$ if mark is detected, NPN: GND if mark is detected
		pin 4: IO-Link SIO mode, $U_B$ if mark detected
		pin 4: IO-Link COM2 mode, see configuration file IODD
Signal voltage high/low		≥ ( $U_B - 2V$ ) ≤ 2V
Output current		max. 100mA
Open-circuit current		≤ 25mA

### Indicators

Green LED in continuous light	ready
Green and yellow LED flashing at 3Hz	teach event active
Green and yellow LED flashing at 8Hz	teaching error
Green LED off and yellow LED flashing at 8Hz	sensor error
Yellow LED in continuous light	mark detected (dependent on the teach sequence)
Transmitter LEDs flashing at 8Hz	teaching error

### Mechanical data

Housing	plastic (PC-ABS), with nickel-plated mounting sleeve
Optics cover	plastic (PMMA)
Weight	10g
Connection type	M8 connector, metal

### Environmental data

Ambient temp. (operation/storage)	-30°C ... +55°C/-30°C ... +70°C
Protective circuit <sup>5)</sup>	2, 3
VDE safety class	III
Protection class	IP 67
Light source	free group (in acc. with EN 62471)
Standards applied	IEC 60947-5-2
Certifications	UL 508, C22.2 No.14-13 <sup>4)</sup> <sup>6)</sup>

### Options

#### Input pin 2

Function characteristics	keyboard lockout / line teach / pulse stretching
Input active/not active	≥ 8V/≤ 2V or not connected

#### Output pin 4

Line teach active	for SIO	2Hz at the switching output
	for COM2	see configuration file IODD
Error after line teach	for SIO	2Hz at the switching output
	for COM2	see configuration file IODD

- 1) Scanning range: recommended range with performance reserve
- 2) Average life expectancy 100,000h at an ambient temperature of 25°C
- 3) At conveyor speed 1m/s
- 4) For UL applications: for use in class 2 circuits according to NEC only
- 5) 2=polarity reversal protection, 3=short-circuit protection for all transistor outputs
- 6) These proximity switches shall be used with UL Listed Cable assemblies rated 30V, 0.5A min, in the field installation, or equivalent (categories: CYJV/CYJV7 or PVVA/PVVA7)

## Tables

## Diagrams

## Remarks

### Operate in accordance with intended use!

- ⚠ This product is not a safety sensor and is not intended as personnel protection.
- ⚠ The product may only be put into operation by competent persons.
- ⚠ Only use the product in accordance with the intended use.

- With glossy objects, the sensor is to be fastened at an inclination of approx. 10° relative to the object surface.

																Measurement value MSB	

Additional information on the IO-Link service data is available on request.

## Static 2-point teach

Suitable for manual positioning of the marks (availability dependent on sensor type).

### Switching threshold in center:

Position the background. 	Press teach button for 2 ... 7s and release.  2 ... 7s Value for background is accepted.	LEDs flash simultaneously.  Simultaneous flashing	Position the mark. 	Briefly press teach button.  Value for mark is accepted.	Sensor in RUN mode. Yellow LED illuminates.  Switching threshold set in the center.
------------------------------	---	---	------------------------	--	---

### Switching threshold near the mark:

Position the background. 	Press teach button for 7 ... 12s and release.  7 ... 12s Value for background is accepted.	LEDs flash alternatingly.  Alternating flashing	Position the mark. 	Briefly press teach button.  Value for mark is accepted.	Sensor in RUN mode. Yellow LED illuminates.  Switching threshold is set near the mark.
------------------------------	---	---	------------------------	--	--

**KRTM 3B**

**Multicolor contrast scanner**

**Dynamic 2-point teach**

Suitable for marks moved during automated machine processes (availability dependent on sensor type).

**Switching threshold in center**

<p>Position the background.</p> 	<p>Press teach button for 2 ... 7s and release.</p> <p>2 ... 7s</p>  <p>Measurement window opens.</p>	<p>LEDs flash simultaneously.</p>  <p><b>Simultaneous flashing</b></p>	<p>Allow marks to pass through dynamically.</p> 	<p>Briefly press teach button.</p>  <p>Measurement window closes.</p>	<p>Sensor in RUN mode. Yellow LED is off.</p>  <p>Switching threshold set in the center.</p>
---	--	---	---	--	---

**Switching threshold near the mark**

<p>Position the background.</p> 	<p>Press teach button for 7 ... 12s and release.</p> <p>7 ... 12s</p>  <p>Measurement window opens.</p>	<p>LEDs flash alternatingly.</p>  <p><b>Alternating flashing</b></p>	<p>Allow marks to pass through dynamically.</p> 	<p>Briefly press teach button.</p>  <p>Measurement window closes.</p>	<p>Sensor in RUN mode. Yellow LED is off.</p>  <p>Switching threshold is set near the mark.</p>
---	--	---	---	--	--

**Static 1-point teach**

Suitable for detecting all marks outside of the reference value (dependent on available sensor type).

**Standard sensitivity**

<p>Position reference value.</p> 	<p>Press the teach button for 2 ...7s.</p> <p>2 ... 7s</p> 	<p>LEDs flash simultaneously.</p>  <p><b>Simultaneous flashing</b></p>	<p>Release teach button.</p>  <p>Value is accepted.</p>	<p>Sensor in RUN mode. Yellow LED is off.</p>  <p>Standard sensitivity is set.</p>
--	--	---	---	---

**High sensitivity**

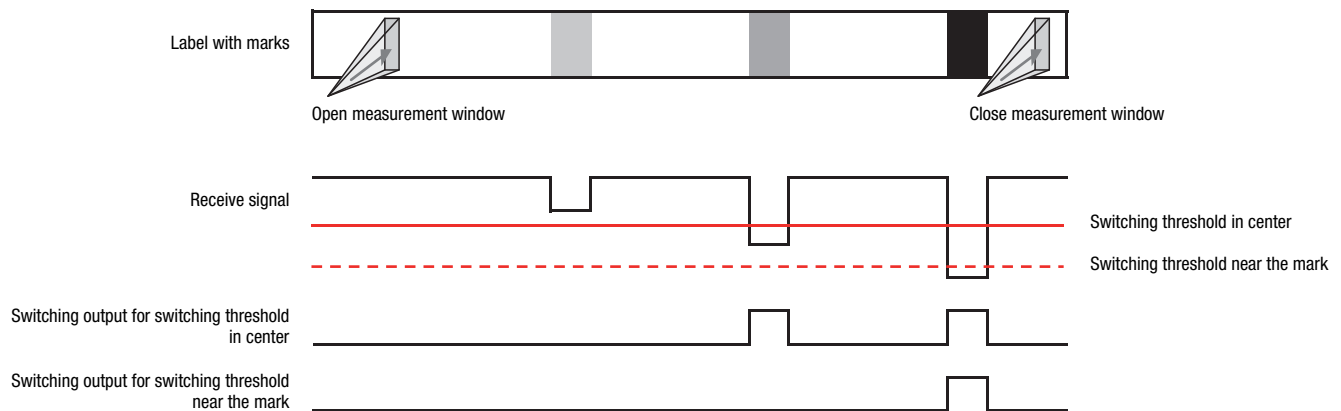

<p>Position reference value.</p> 	<p>Press the teach button for 7 ...12s.</p> <p>7 ... 12s</p> 	<p>LEDs flash alternatingly.</p>  <p><b>Alternating flashing</b></p>	<p>Release teach button.</p>  <p>Value is accepted.</p>	<p>Sensor in RUN mode. Yellow LED is off.</p>  <p>High sensitivity is set.</p>

## Switching threshold diagrams

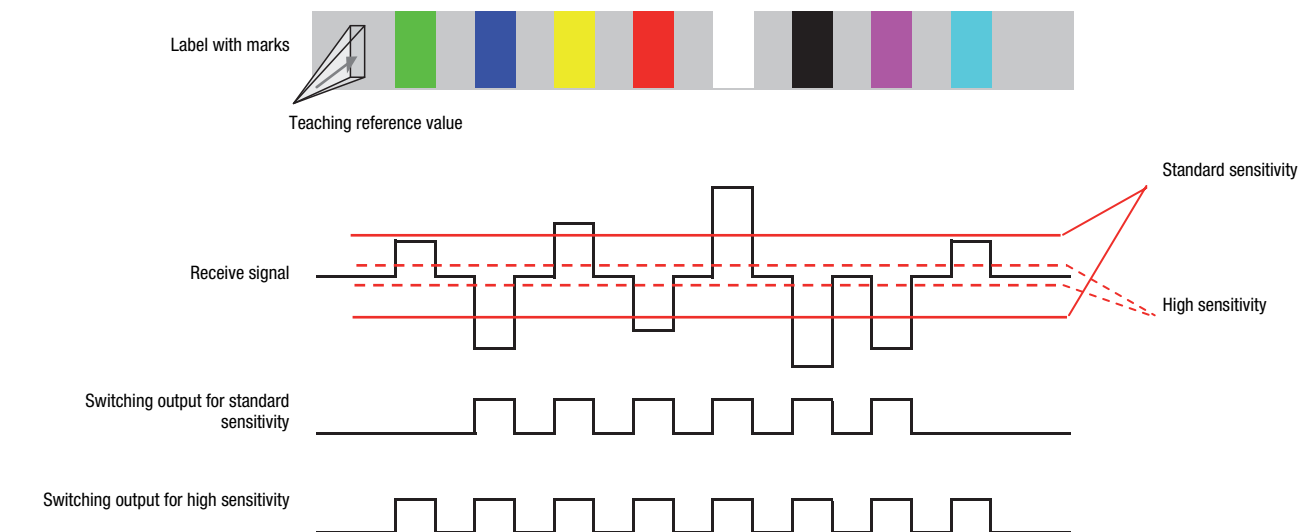

### Static 2-point teach

### Dynamic 2-point teach

### Static 1-point teach

**KRTM 3B**

**Multicolor contrast scanner**

**Pulse stretching option**

Switching pulse stretching on or off:

**"EasyTune" option - fine tuning of the switching threshold**

Following power-on and completed teach event:

Green LED illuminates continuously (ready)

Yellow LED on/off continuously (mark detected/not detected)

**Increasing the switching threshold:**

Long press of the button = large force expenditure = increase switching threshold  
 Each press of the button with a duration between 200ms and 2s increments the switching threshold.

A press of the button is acknowledged by a single, brief flash of the green LED – the new switching threshold is now valid.

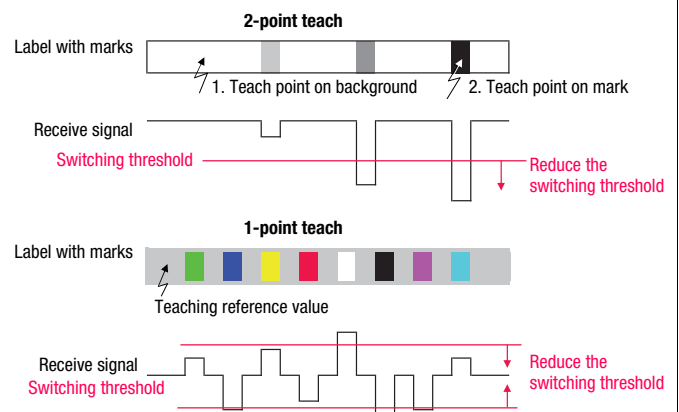

**Reducing the switching threshold:**

Short press of the button = small force expenditure = reduce switching threshold  
 Each press of the button with a duration between 2ms and 200ms decrements the switching threshold.

A press of the button is acknowledged by a single, brief flash of the green LED – the new switching threshold is now valid.

If the upper or lower end of the adjustment range is reached, the green and yellow LEDs flash at a considerably higher frequency of 8Hz for the duration of one second.

### Sensor adjustments via the input IN (Pin 2)

The following description applies to PNP switching logic!

Signal level LOW  $\leq 2V$

Signal level HIGH  $\geq (U_B - 2V)$

With the NPN models, the signal levels are inverted!

#### Switching threshold in center / standard sensitivity

#### Switching threshold near the mark / high sensitivity

#### Pulse stretching ON

#### Pulse stretching OFF

### Locking the teach button via the input IN (Pin 2)

A static HIGH signal ( $\geq 20ms$ ) at the teach input locks the teach button on the sensor if required, such that no manual operation is possible (e.g., protection from erroneous operation or manipulation).

If the teach input is not connected or if there is a static low signal, the button is unlocked and can be operated freely.
