

Temposonics®

Magnetostrictive Linear Position Sensors

DATA SHEET MXR Analog

- External mounting for new or retrofit designs
- Rugged, up to 100 g shock and 15 g vibration levels
- Flexible, capability to measure a range from 100 to 600 mm

Product overview

The MH-Series Model MXR sensor is available in two versions. The MXRC and the MXRS. Although the two versions are similar in both appearance and performance, there are unique features distinguishing the two sensors from one another. The MXRC is available in four discrete stroke lengths up to 250 mm, while the MXRS is available in stroke lengths up to 600 mm (50 mm ordering increments). The MXRC works with a 5 VDC operating voltage, and provides a voltage output that is ratiometric to the operating voltage. The MXRS can work with an operating voltage of either 12 or 24 VDC, and has multiple analog output options available.

Technical data

	MXRS	MXRC
Input		
Measured value	Linear Position measurement	Linear Position measurement
Stroke length	100...500 mm	109.5 mm, 148.0 mm, 217.3 mm, and 250.1 mm
Output		
Voltage	0.25...4.75 VDC, 0.5...4.5 VDC	0.1...4.9 VDC at +5 VDC supply, ratiometric with V supply
Current	4...20 mA	–

Connections and wiring

Connection Type

The Temposonics® M12 integrated connector (shown in Figure 3), meets the most stringent protection requirements important for the difficult environmental conditions of mobile hydraulics applications. Protection type IP69K makes the robust metal housing not only completely dust and waterproof, even the harshest cleaning measures cannot damage the sensor.
