Model Number

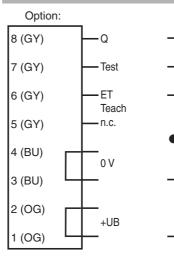

RL28-54-G-Z/76a/110/116

Retroreflective sensor with terminal compartment

Features

- Detects transparent objects, i.e., ٠ clear glass, PET and transparent films
- TEACH-IN switch for setting the contrast detection levels
- Automatic adjustment in case of soi-٠ ling in contrast detection mode
- ٠ Ultra bright LEDs for power on, pre fault indication and switching state
- Flashing power on LED in case of short-circuit
- Not sensitive to ambient light, even ٠ with energy saving lamps
- Impulsed time element off-delay ٠
- Waterproof, protection degree IP67 •
- Protection class II •

Technical data			Accessories	
General specifications				
Effective detection range		0 5.6 m	OMH-05	
Reflector distance		0 5.6 m	Mounting aid for round steel ø 12 mm or	
Threshold detection range		7 m	sheet 1.5 mm 3 mm	
Reference target		H85-2 reflector	ОМН-07	
Light source		LED	Mounting aid for round steel ø 12 mm or	
Light type		modulated visible red light , 660 nm	sheet 1.5 mm 3 mm	
Diameter of the light spot		approx. 90 mm at a distance of 5.6 m	OMH-21	
Angle of divergence		Emitter: 1 ° Receiver: 1.2 °	Mounting bracket	
Ambient light limit		50000 Lux	Mounting bracket	
Functional safety related par	ameters		OMH-22	
MTTF _d		1020 a	Mounting bracket	
Mission Time (T _M)		20 a		
Diagnostic Coverage (DC)		90 %	OMH-MLV11-K	
Indicators/operating means			dove tail mounting clamp	
Operating display		LED green, flashes in case of short-circuit	OMH-RLK29	
Function display		2 LEDs yellow for switching state, stability control, TEACH-IN and contrast detection mode	Mounting bracket	
Controls		rotary switch for light/dark, 5-step switch for contrast recognition adjustment	OMH-RLK29-HW	
Contrast detection levels		10 % - clean, water filled PET bottles 18 % - clear glass bottles	Mounting bracket for rear wall mounting	
		40 % - colored glass or opaque materials adjustable by TEACH-IN key or external wire	OMH-RL28-C Protective cover	
Electrical specifications				
Operating voltage	UB	10 30 V DC	Other suitable accessories can be found at	
Ripple		10 %	www.pepperl-fuchs.com	
No-load supply current	I ₀	≤ 50 mA		
Input				
Test input		emitter deactivation at +U _B		
Function input		Ext. Teach-In input (ET)		
Output				
Switching type		light/dark on switchable		
Signal output		1 push-pull output, short-circuit protected, reverse polarity pro- tected		
Switching voltage		max. 30 V DC		
Switching current		max. 100 mA		
Voltage drop	U _d	≤ 2.5 V DC		
Switching frequency	f	1000 Hz		
Response time		0.5 ms		
Timer function		Impulsed time element off-delay 20 ms		
Ambient conditions				
Ambient temperature		-40 60 °C (-40 140 °F)		
Storage temperature		-40 75 °C (-40 167 °F)		
Mechanical specifications				
Protection degree		IP67		
Connection		terminal compartment with 8 spring-loaded terminals for wire cross section 0.5 1.5 mm ² , insulation stripping 7.5 8.5 mm, M16 x 1.5 cable gland		
Material				
Housing		Plastic ABS		
Optical face		Plastic pane		
Mass		90 g		
Compliance with standards a ves	and direct	-		
Standard conformity				
Product standard		EN 60947-5-2:2007		
Approvals and certificates				
Protection class		II, rated voltage \leq 250 V AC with pollution degree 1-2 according to IEC 60664-1 Caution! The protection class 2 is only valid when the terminal compartment is closed.		
UL approval		cULus		
CCC approval		Products with a maximum operating voltage of ≤36 V do not bear a CCC marking because they do not require approval.

Curves/Diagrams

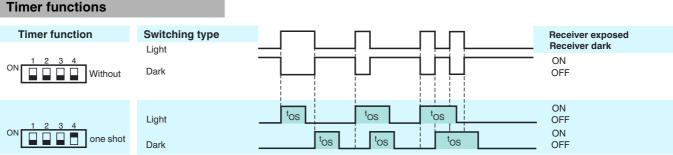

TEACH-IN

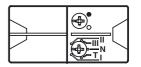

• Switch position "N" (standard operation):

LEDs are lit when the light beam is unobstructed, they flash when the value falls short of the function reserve and they go out when the beam is interrupted.

- Switch position "T" (Teach-in mode): After 1 s, the LED flashes slowly (approx. 1.5 Hz). The sensor is now ready to be set for a specific contrast detection value
- either via the mechanical switch (pos. I, II or III) or an external signal.
- Switch positions "I", "II" and "III" (contrast detection mode)
- Contrast recognition values: I for 10 %, II for 18 %, III for 40 %
- 1. LED permanently lit: light path unobstructed
- 2. LED off: element to be sensed detected
- 3. LED flashes rapidly: detection failure, excessive soiling, function reserve too low.
- Ext. TEACH-IN input
- The desired contrast recognition capability can be adjusted by applying of a logic "high" pulse with a certain pulse lenght when the switch is in position T. I: 50 ms (30 ms ... 100 ms)
- II: 150 ms (100 ms ... 200 ms) III: > 200 ms
- It is possible to change the contrast detection level without re-teaching. For contras detection mode (Teach-Mode) the stability reseve must be at least 2.5 (see curve "relative received light strength").

The Light-/Dark-Switch (Left, outer switch) is shown in the "Dark ON" position.

Additional information

Mounting instructions:

The sensor is held in place by two pass-through drill holes for M5. The surface underneath must be flat to prevent the housing from moving when it is tightened into position. We recommend securing the nuts in place with spring screws to prevent the sensor from going out of adjustment.

Outdoor mounting:

The sensors must be protected from shock and splashed water. It may be necessary to provide a covering.

Adjustment:

Align the unit to the reflector in the "N" switch setting. The yellow LED must be lit constantly. Move the switch to the "T" setting and wait for about 1 sec. until the yellow LED starts flashing slowly.

Move the switch to the setting for the desired contrast detection level: "I" for 10%, "II" for 18%, "III" for 40%.

or

In switch setting "T", select the appropriate contrast detection level by applying a pulse through the control lead to connection pin 5 (see "TEACH-IN").

Contrast detection levels:

The output becomes inactive if dirt and dust make it impossible to readjust the setting. In this case the yellow LED will flash quickly.

If dirt and dust continue to accumulate, detection of slight contrasts can no longer be guaranteed.
