

#### **Model Number**

#### DK10-LAS/9S50/76a/110/124

Print mark contrast sensor with 5-pin, M12 x 1 connector

## **Features**

- Laser print mark contrast sensor for recording very small print marks
- Large focus depth range from 3 mm ... 300 mm
- Laser class 2, eyesafe
- Adjustable sensitivity
- 30 µs response time, suitable for extremely rapid scanning processes
- Time function

# **Product information**

The contrast sensor series DK10, DK2X, DKE2X and DK3X have an extreme robust and IP67 tight industrial standard housing with eight M5 metal reinforced inserts for sensor mounting. The lenses are made of high grade glass. All sensors offer different light spot shapes and orientations and have powerful push-pull outputs (NPN/PNP/pushpull).

The DK10 sensor series offers laser and LED light sources, a manual sensitivity adjustment and high sensing ranges up to 800 mm.

The DK20/DK21/DKE2X standard contrast sensor series offers a very good contrast recognition and are available in extreme robust stainless-steel housings (DKE).

The DK31/DK34/DK35 sensor series is designed for cutting edge contrast recognition at highest sensitivity level.

The series DK20/DK34 offer a static Teach-In, the DK21/DKE21/DK31/DK35 series offer a dynamic Teach-In.

Technical data			
General specifications			
Sensor range		300 mm	
Detection range		3 300 mm	
Light source		laser diode	
Light type		modulated visible red light	
Laser nominal ratings			
Note		LASER LIGHT , DO NOT STARE INTO BEAM	
Laser class		2	
Wave length		650 nm	
Beam divergence		< 1.5 mrad	
Pulse length		1.5 µs	
Repetition rate		108.7 kHz	
max. pulse energy		2.1 nJ	
Light spot representation		approx. 0.8 mm at a distance of 300 mm	
Ambient light limit			
Continuous light		40000 Lux	
Functional safety related param	eters		
MTTF <sub>d</sub>		550 a	
Mission Time (T <sub>M</sub> )		20 a	
Diagnostic Coverage (DC)		60 %	
Indicators/operating means			
Function indicator		LED yellow: lights up if receiver is lit (light on), lights up if receiver	
		is not lit (dark on)	
Control elements		Light/Dark switch, sensitivity adjuster	
Electrical specifications			
Operating voltage	U <sub>B</sub>	10 30 V DC	
Ripple		10 %	
No-load supply current	I <sub>O</sub>	≤ 55 mA	
Input			
Test input		emitter deactivation with +Ub	
Output			
Switching type		light/dark on switchable	
Signal output		Push-pull output, short-circuit protected, reverse polarity protec-	
3		ted	
Switching voltage		PNP: U <sub>B</sub> - 2.5 V / NPN: U <sub>Rest</sub> 1.5 V	
Switching current		max. 200 mA	
Switching frequency	f	16.5 kHz	
Response time		30 μs	
Timer function		rising edge , mono stable	
Pulse length		50 ms	
Ambient conditions			
Ambient temperature		-10 50 °C (14 122 °F)	
Storage temperature		-20 75 °C (-4 167 °F)	
Mechanical specifications			
Protection degree		IP67	
Connection		M12 x 1 connector, 5-pin

Female cordset, M12, 5-pin, PVC cable

## V15-W-5M-PVC

Female cordset, M12, 5-pin, PVC cable

# OMH-DK

Right-Angled Mounting Bracket

## OMH-DK-1

Flat Mounting Bracket

Other suitable accessories can be found at www.pepperl-fuchs.com

# **Curves/Diagrams**

# **Adjustment instructions**

# Switching threshold adjustment

The required switching threshold is adjusted with the sensitivity control. Please proceed as follows:

- 1. Switch the light/dark change-over switch to the light setting.
- 2. Point the light spot at the light part of the surface being scanned.
- If the yellow indicator LED lights up, turn the sensitivity control to the left until the indicator LED goes off again.If the yellow indicator LED does not light up, miss out this step.
- 4. Turn the sensitivity control to the right until the indicator LED just lights up.
- 5. Point the light spot at the dark part of the surface being scanned.
- 6. The indicator LED must have gone off.
- 7. Turn the sensitivity control to the right again until the indicator LED lights up again. Counting the number of turns.
- 3. Turn the sensitivity control back to the left by half the number of counted turns.

Once the DK10 colour mark scanner has been adjusted in this way, the switching thres-hold is exactly in the middle of the measured light and dark values. The greater the number the number of times the sensitivity control is turned between the light and the dark marks, the greater the contrast.

**Recommendation:** The number of turns should be to > 0.5.

#### Switching mode adjustment:

	Setting of light/dark switch	Receiver	Output PNP	Output NPN
Ī	н	exposed	inactive	active
		unexposed	active	inactive
	D	exposed	active	inactive
	D	unexposed	inactive	active

## Laser notice laser class 2

- The irradiation can lead to irritation especially in a dark environment. Do not point at people!
- Caution: Do not look into the beam!
- Maintenance and repairs should only be carried out by authorized service personnel!
- Attach the device so that the warning is clearly visible and readable.
- Caution Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.
