# Background suppression sensor

#### **Model Number**

#### ML7-8-H-350-IR/65a/115b/120

Background suppression sensor with fixed cable and M12 connector, 4-pin

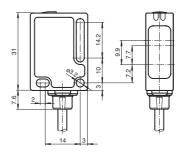

#### **Features**

- Miniature design
- Reliable detection of all surfaces, in-٠ dependent of color and structure
- Minimal black-white difference ٠
- Precision background suppression, • adjustable
- Clearly visible function indicators
- Short circuit and low voltage indicator •
- Certified by ECOLAB

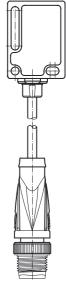

# **Product information**

Small, robust, effective, and reliable - these are the properties of the ML7 sensor series. Due to their small size, number of versions, and two different lens positions, they are particularly suited for installation in tight spaces. The robust design and high quality of Pepperl+Fuchs mean they can also be used under harsh environmental conditions. The efficient technology, switching frequencies up to 1000 Hz, high resistance to ambient light, and 4-in-1 output make the series suitable for non-contact object detection.
