Features

- 1-channel isolated barrier
- 24 V DC supply (Power Rail)
- Output 45 mA at 10 V DC
- · Logic input, non-polarized
- · Error message output
- · Line fault detection (LFD)
- Up to SIL2 acc. to IEC 61508

Function

This isolated barrier is used for intrinsic safety applications.

It supplies power to solenoids, LEDs, and audible alarms, located in a hazardous area.

It is controlled via a logic signal. The input has two defined states: 1-Signal = 16 V DC \dots 30 V DC, 0-

Signal = 0 V DC ... 5 V DC. The current consumption of the input is about 3 mA.

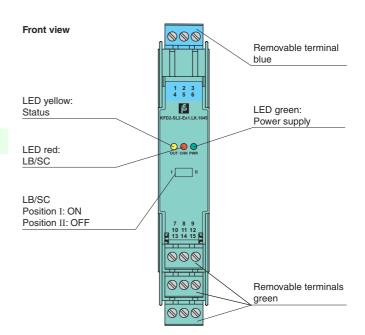

At full load, $10\ V$ at $45\ mA$ is available for the hazardous area application.

If the field impedance is > 10 k Ω for lead breakage or < 50 Ω for short circuits a line fault is detected.

During an error condition, the fault indication output deenergizes.

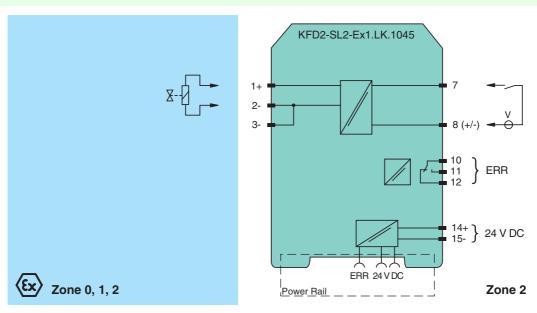

A fault is signalized by LEDs acc. to NAMUR NE44 and a separate collective error message output.

Assembly

Connection

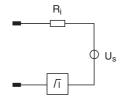

General specifications		
		Digital Output
Signal type		Digital Output
Supply		
Connection		Power Rail or terminals 14+, 15-
Rated voltage		19 30 V DC
Power consumption		≤ 1.9 W at 45 mA output current
Input		
Connection		terminals 7, 8
Input current		approx. 3 mA
Signal level		1-signal: 16 30 V DC 0-signal: 0 5 V DC
Output		
Output I		
Connection		terminals 1+, 2- or 3-
Internal resistor	R _i	300 Ω
Current	l _e	≤ 45 mA
Voltage	U _e	≥ 10 V
Open loop voltage	U _s	≥ 23.5 V
Output signal		These values are valid for the rated operational voltage 19 30 V DC.
Energized/De-energized delay		≤ 20 ms / ≤ 20 ms
Line fault detection		signal at short-circuit R _B < 50 Ω , lead breakage R _B > 10 k Ω ; test current < 650 μ A
Output II		fault signal
Connection		terminals 10, 11, 12, non-intrinsically safe
Contact loading		253 V AC/2 A/cos φ > 0.7; 40 V DC/2 A resistive load
		2 x 10 ⁷ switching cycles
Mechanical life		
Energized/De-energized delay		≤ 20 ms / ≤ 20 ms
Electrical isolation		
Input/power supply		functional insulation acc. to EN 50178, rated insulation voltage 50 V _{eff}
Directive conformity		
Electromagnetic compatibility		
Directive 2004/108/EC		EN 61326-1:2006, EN 61000-6-4:2007
Low voltage		
Directive 2006/95/EC		EN 50178:1997
Conformity		214 00 17 0.1007
•		NE 04,0000
Electromagnetic compatibility		NE 21:2006
Protection degree		IEC 60529
Ambient conditions		
Ambient temperature		-20 60 °C (-4 140 °F)
Mechanical specifications		
Protection degree		IP20
Mass		approx. 150 g
Dimensions		20 x 119 x 115 mm (0.8 x 4.7 x 4.5 in) , housing type B2
Data for application in connection		20 X 110 X 110 X 111 X 110 X 117 X 1

Output characteristic

Accessories

Power feed module KFD2-EB2

The power feed module is used to supply the devices with 24 V DC via the Power Rail. The fuse-protected power feed module can supply up to 100 individual devices depending on the power consumption of the devices. A galvanically isolated mechanical contact uses the Power Rail to transmit collective error messages.

Power Rail UPR-03

The Power Rail UPR-03 is a complete unit consisting of the electrical inset and an aluminium profile rail 35 mm x 15 mm. To make electrical contact, the devices are simply engaged.

Profile Rail K-DUCT with Power Rail

The profile rail K-DUCT is an aluminum profile rail with Power Rail insert and two integral cable ducts for system and field cables. Due to this assembly no additional cable guides are necessary.

Power Rail and Profile Rail must not be fed via the device terminals of the individual devices!
