Background suppression sensor with 2 m fixed cable

Features

- Diffuse mode sensor with multiple ٠ light spots
- Specially designed for detecting criti-٠ cal objects such as PCBs
- Detects objects in front of a close • background through precise background suppression
- Precision object detection, almost ir-٠ respective of the color
- Tamper-proof, no operating controls
- Plug and Play •
- Not sensitive to ambient light, even with switched energy saving lamps

Product information

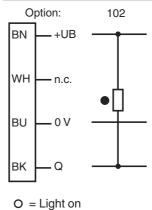

Small, robust and reliable, the ML8 series of miniature sensors is particularly suitable for non-contact detection of objects in confined spaces. The LED indicator is located behind the lens and provides reliable information on the sensor's operating status. The LED is always visible, even if the sensor is completely embedded. Flexible mounting options and fixed preset detection ranges simplify setup and operation.
