

# Model number

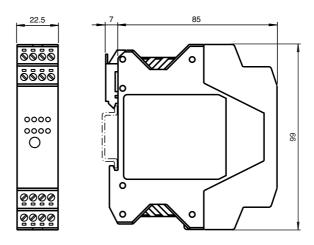

### VBA-2A-KE2-I/U

KE control cabinet module 2 analog outputs

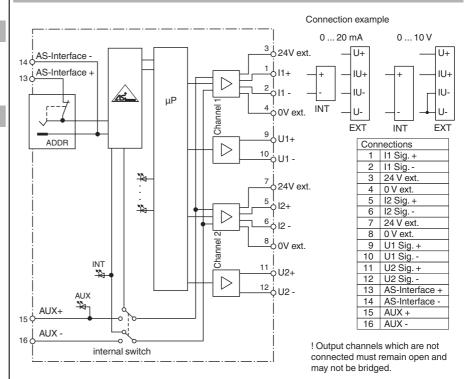

### **Features**

- · Housing with removable terminals
- · Communication monitoring
- Addressing jack
- Function display for bus, external auxiliary voltage and outputs
- Power supply of outputs external or from the module, as required

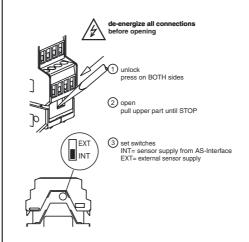

### **Dimensions**

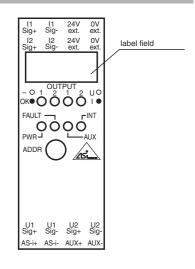

## **Electrical connection**

# **Indicating / Operating means**

AS-Interface ar	aloç	g module
Technical data		
General specifications		
Slave type		Standard slave
AS-Interface specification		V3.0
Required master specification		≥ V2.1
UL File Number		E223772
Indicators/operating means		
LED FAULT		error display; LED red
		red: communication error red flashing: peripheral error or address 0
LED INT		Internal input supply active; LED green
LED PWR		AS-Interface voltage; LED green green: AS-Interface voltage OK green flashing: peripheral error or address 0
LED AUX		ext. auxiliary voltage U <sub>AUX</sub> ; LED green
LED -/OK		Status of output signal; green LED off: not connected (current module only) to: Signal within value range flashing: Signal outside value range
LED U/I		Current or voltage module; LED green off: Voltage output on: Current output
Electrical specifications		
Auxiliary voltage (output)	U <sub>AUX</sub>	24 V DC ± 15 % PELV (protection class 3 according to VDE 0106/IEC 364-4-41)
Insulation voltage	Ui	≥ 500 V
Rated operating voltage	$U_e$	26.5 31.6 V from AS-Interface
Rated operating current	l <sub>e</sub>	Supply via AS-Interface: ≤ 100 mA supply via AS-Interface and U <sub>AUX</sub> : ≤ 120 mA
Output		
Number/Type		2 analog outputs Current: 4 20 mA ± 0.5 % voltage: 0 10 V ± 0.5 %
Open loop voltage	$U_s$	current output: max. 21 V (dependent on the supply voltage)
Supply		from AS-Interface or from external auxiliary voltage as required $\mathbf{U}_{\text{AUX}}$
Load		voltage output: $\geq$ 1.2 $k\Omega$ current output: $\leq$ 600 $\Omega$
Current loading capacity		≤ 150 mA (signal current + actuator supply) from AS-Interface; overload and short-circuit protected ≤ 500 mA (signal current + actuator supply) from external bulk power supply U <sub>AUX</sub> , overload and short-circuit protected
Resolution		16 Bit / 1 μA (current module) or 16 bit / 1 mV (voltage module)
Short-circuit current		voltage output: ≤ 18 mA
Programming instructions		
Profile		S-7.3.5
IO code		7
ID code		3
ID2 code		5
Data bits (function via AS-Interface)		The transfer of the data value is based on AS-Interface Profile 7.3.
Parameter bits (programmable via AS-i)		function
P0		PO=1: Automatic detection of module type PO=0: Manual adjustment of the module type with P1 and P3
PI		Programming channel 1 P1=1: Channel 1 current output P1=0: Channel 1 voltage output
P2		Message of peripheral error P2=1, peripheral error is reported P2=0, peripheral error is not reported
P3		Programming channel 2 P3=1: Channel 2 current output P3=0: Channel 2 voltage output
Ambient conditions		
Ambient temperature		0 55 °C (33 131 °E)

# **Function**

The VBA-2A-KE2-I/U analog module has two analog outputs onto which the actuators with current input (4 mA ... 20 mA) or voltage input (0 ... 10 V) can be connected. The module automatically recognises whether or not an actuator processing current or voltage is situated at the output. Accordingly, the type of module must be the same for each channel. The voltage supply to the actuators takes place depending on the position of the internal slide switch, via the module (from the AS-Interface) or through an external voltage source. The choice of output supply is displayed by the INT and AUX LEDs.

The conversion of the measured value and data transmission take place asychronously according to AS-Interface Profile 7.3. The resolution of the analog values amounts to 16 Bit (1 µA and/or. 1 mV) with a value range from 0...20000 (current module) and/or. (voltage module). 0 ... 10000 2nd channel can be switched off with a second slide switch.

The housing which is only 22.5 mm wide occupies only a little space in the switch cabinet. The module is mounted by snapping onto the 35-mm support rail in compliance with EN 50022.

The connection is made using pluggable terminal (COMBICON). Four-terminal blocks (black) are used for the outputs. The connection of the external bulk power and the AS Interface is made using 2-terminal blocks (bulk power grey, AS-Interface yellow). This enables easy separation of the individual actuators or the supply during commissioning or service.

# **Accessories**

### VBP-HH1-V3.0-KIT

AS-Interface Handheld with accessory

## **VBP-HH1-V3.0**

AS-Interface Handheld

### VAZ-PK-1,5M-V1-G

Adapter cable module/hand-held programming device

removable terminals rated connection capacity:

0.25 mm<sup>2</sup> ... 2.5 mm<sup>2</sup>

rigid/flexible (with and without wire-end ferrules):

for multiple-wire connection with two wires of equal cross-secflexible with twin wire-end ferrules: 0.5 mm<sup>2</sup> ... 1.5 mm<sup>2</sup>

IP20

Compliance with standards and directives

Directive conformity

EMC Directive 2004/108/EC EN 61000-6-2:2005, EN 61000-6-4:2007, EN 50295:1999

Standard conformity

EN 61000-6-2:2005, EN 50295:1999

Protection degree EN 60529

# **Notes**

Noise immunity

Do not connect inputs and outputs, which are supplied via the module from AS-interface or via auxiliary power, with power supply and signal circuits with external potentials.
