

Technical data

Mechanical specifications

Material	Hardened tool steel
Mass	1.8 g
Note	2 spare blades

Notes

Blade change:

1. Slide the blade from the recesses (see point 1) with a pointed tool such as a pin punch, gently applying light pressure.
2. Drop one or two drops of two-component adhesive in the blade guide.
3. Slide the replacement blades in the blade guides.
4. Let the glue dry.

Model number

VAZ-FK-R-STRIPPER-BLADES

Spare blades / stripping pliers for AS-Interface flat cable

Features

- Special hardened blade
