VOS412-BIS-60-WH-F119

Sheet inspection sensor for monitoring print by comparing stored images or barcode evaluation, right angle version

Automatic learning of the reference

Automatic search for optimum image

Integrated error image memory

Reliable detection at object speeds

Integrated illumination

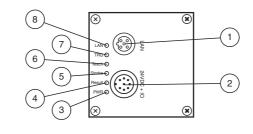

### Function

The sheet identification sensor from Pepperl+Fuchs enables fast and simple monitoring of the correct sheet sequence in collating, folding and binding machines. Sheets can be monitored either by using the image comparison method or reading in barcodes printed on the sheets.

The device can be operated locally, as a stand-alone unit or in a network where several sensors are connected together. The sensor includes a camera, illumination unit and evaluating computer with digital input and output signals as well as a network interface. Typical areas of application are:

- prical areas of applicat
- Printing machines
- Folding machines
- Tying machines

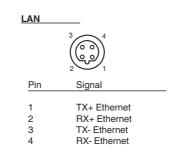

## Indicating / Operating means

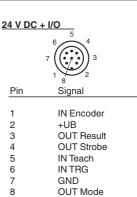

1	Socket LAN	
2	Plug 24VDC + IO	
3	Power	green
4	Result	green
5	Stobe	yellow
6	Teach	yellow
7	Trigger	yellow
8	LAN	yellow
