Features

- 4-channel
- · Outputs with plug-in Ex e terminals
- Installation in suitable enclosures in Zone 1
- Analog output module for 0/4 mA ... 20 mA
- HART communication via field bus or service bus
- Simulation mode for service operations (forcing)
- Line fault detection (LFD): one LED per channel
- · Permanently self-monitoring
- Module can be exchanged under voltage (hot swap)

Function

The device drives positioners, proportional valves, I/P converters, or local indicators.

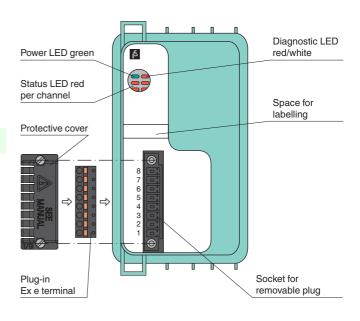

Open and short circuit line faults are detected.

The device is supplied with plug-in Ex e terminals and protective cover.

The outputs are galvanically isolated from the bus and the power supply.

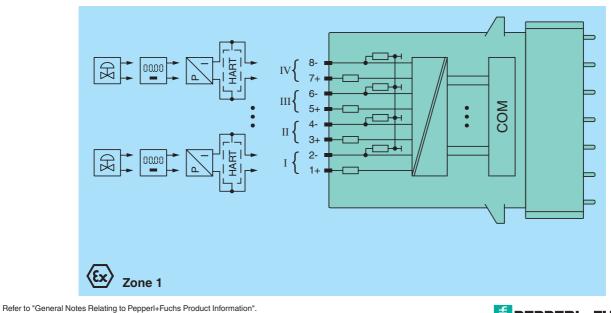

Assembly

Connection

Supply		
Connection		backplane bus
Rated voltage	U _n	12 V DC, only in connection with the power supplies FB92**
Power loss	On	1.5 W
		3 W
Power consumption Internal bus		3 W
		haakalana hua
Connection		backplane bus
Interface		manufacturer-specific bus to standard com unit
Output		
Number of channels		4
Suitable field devices		proportional valves, I/P converter, local indicators
Connection		channel I: 1+, 2-; channel II: 3+, 4-; channel III: 5+, 6-; channel IV: 7+, 8-
Current		0 25 mA short-circuit protected
Load		750Ω max.
Line fault detection		can be switched on/off for each channel via configuration tool, configurable via configuration tool
Short-circuit		Ex works settings: $< 50 \Omega$ configurable between 0 26 mA
Open-circuit		deviation of preset output value > 0.5 mA
Watchdog		within 0.5 s the device goes in safe state, e.g. after loss of communication
Transfer characteristic	cs	
Deviation		
After calibration		0.1 % of the signal range at 20 °C (68 °F)
Influence of ambient temperature		0.1 %/10 K of the signal range
Refresh time		100 ms
Indicators/settings		
LED indicator		Power LED (P) green: supply
		Diagnostic LED (I) red: module fault, red flashing: communication error, white: fixed parameter set (parameters from com unit are ignored), white flashing: requests parameters from com unit
		Status LED (1-4) red: line fault (lead breakage or short circuit)
Coding		optional mechanical coding via front socket
Directive conformity		The state of the s

General information		

System information	The module has to be mounted in appropriate backplanes (FB92**) in Zone 1, 2, or outside hazardous areas. Here, the corresponding EC-Type Examination Certificate has to be observed.
Supplementary information	EC-Type Examination Certificate, Statement of Conformity, Declaration of Conformity, Attestation of Conformity and instructions have to be observed where applicable. For information see www.pepperl-fuchs.com.
