Features

- 4-channel
- · Outputs with plug-in Ex e terminals
- Installation in suitable enclosures in Zone 1
- Analog output module for 0/4 mA ... 20 mA
- · HART communication via field bus or service bus
- Simulation mode for service operations (forcing)
- Line fault detection (LFD): one LED per channel
- Elife tault detection (El B): one EEB per
- Permanently self-monitoring
- Up to SIL2 acc. to IEC 61508
- Module can be exchanged under voltage (hot swap)

Function

The device drives positioners, proportional valves, I/P converters, or local indicators.

Open and short circuit line faults are detected.

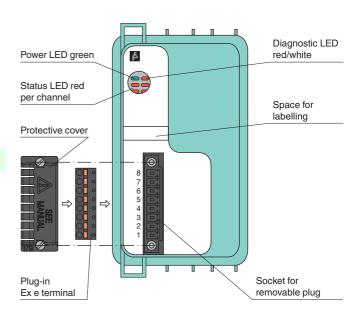

The output can be switched off via a contact. This can be used for bus-independent safety applications.

The device is supplied with plug-in Ex e terminals and protective cover.

The outputs are galvanically isolated from the bus and the power supply.

Connection

Supply		
Supply		advalana husa
Connection		ackplane bus
Rated voltage		2 V DC , only in connection with the power supplies FB92**
Power loss		5 W
Power consumption	3	W
Internal bus		
Connection	ba	ackplane bus
Interface	m	nanufacturer-specific bus to standard com unit
Output		
Number of channels	4	
Suitable field devices		roportional valves, I/P converter, local indicators
Connection	cł	nannel I: 1+, 2-; channel II: 3+, 4-; channel III: 5+, 6-; channel IV: 7+, 8-
Current	0	25 mA short-circuit protected
Load		50 Ω max.
Line fault detection		an be switched on/off for each channel via configuration tool , configurable via configuration tool
Short-circuit		x works settings: $<$ 50 Ω configurable between 0 26 mA
Open-circuit		eviation of preset output value > 0.5 mA
Watchdog		ithin 0.5 s the device goes in safe state, e.g. after loss of communication
Transfer characteristics		
Deviation		
	0	1 % of the signal range at 20 °C (68 °F)
After calibration		.1 % of the signal range at 20 °C (68 °F) .1 %/10 K of the signal range
Influence of ambient temperature		, ,
Refresh time	10	00 ms
Indicators/settings		150 (0)
LED indicator	D (p	ower LED (P) green: supply iagnostic LED (I) red: module fault, red flashing: communication error, white: fixed parameter set parameters from com unit are ignored), white flashing: requests parameters from com unit tatus LED (1-4) red: line fault (lead breakage or short circuit)
Coding	o	ptional mechanical coding via front socket

System information	The module has to be mounted in appropriate backplanes (FB92**) in Zone 1, 2, or outside hazardous areas. Here, the corresponding EC-Type Examination Certificate has to be observed.
Supplementary information	EC-Type Examination Certificate, Statement of Conformity, Declaration of Conformity, Attestation of Conformity and instructions have to be observed where applicable. For information see www.pepperl-fuchs.com
