## Features

- 4-channel
- · Inputs Ex ia
- Power supply for 2-wire transmitters with 4 mA ... 20 mA
- Supply circuit 15 V (20 mA)
- · Input from active signals of 4-wire transmitters
- Installation in suitable enclosures in Zone 1 or Zone 21
- Simulation mode for service operations (forcing)
- · Line fault detection (LFD): one LED per channel
- · Permanently self-monitoring
- Module can be exchanged under voltage (hot swap)

## Function

The transmitter power supply feeds 2- and 3-wire transmitters. Active signals from separately powered field devices and 4wire transmitters can be connected.

Open and short-circuit line faults are detected.

The intrinsically safe inputs are galvanically isolated from the bus and the power supply.

## Assembly

CE

## Connection

Voltage	Uo	27 V
Current	Ι <sub>ο</sub>	90 mA
Power	Po	588 mW (linear characteristic)
Input		
Voltage	Uo	0.7 V
Current	Ι <sub>ο</sub>	2.78 mA
Power	Po	2 mW (trapezoid characteristic curve)
Internal capacitance	Ci	242 nF
Internal inductance	Li	0 mH
Electrical isolation		
Input/power supply, internal bus		safe electrical isolation acc. to EN 60079-11:2007 , voltage peak value 375 V
Directive conformity		
Directive 94/9/EC		EN 60079-0:2009 EN 60079-1:2007 EN 60079-11:2012 EN 60079-26:2007
General information		
System information		The module has to be mounted in appropriate backplanes and housings (FB92**) in Zone 1, 2, 21, 22 or outside hazardous areas (gas or dust). Here, the corresponding EC-Type Examination Certificate has to be observed.
Supplementary information		EC-Type Examination Certificate, Statement of Conformity, Declaration of Conformity, Attestation of Conformity and instructions have to be observed where applicable. For information see www.pepperl-fuchs.com.
