# UB250-F77-E1-V31

## Dimensions

## **Electrical Connection**

## Pinout

#### Wire colors in accordance with EN 60947-5-2

1	BN	(brown)
2	WH	(white)
3	BU	(blue)
4	BK	(black)

### Accessories

#### UB-PROG4-V31

Programming unit for ultrasonic sensors with Teach-in input at pin 2

OMH-ML7-01 Mounting bracket

V31-GM-2M-PVC Female cordset, M8, 4-pin, PVC cable

## V31-WM-2M-PVC

Female cordset, M8, 4-pin, PVC cable

#### **Description of Sensor Function**

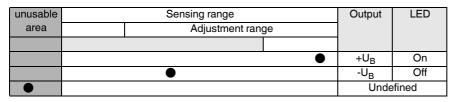

The ultrasonic sensor transmits ultrasonic packets in quick succession and responds to their reflection off the detected object. The sensor has a switch output. The switching point is progammable (Teach-In). Objects beyond the taught-in switching point are not detected (background suppression).

#### **Teach-In of Switching Point SP**

To teach in a switching point, proceed as follows:

- 1. Connect the sensor and turn on the operating voltage.
- 2. Place the object to be detected at the required distance.
- Connect the teach-in input (ET) to -U<sub>B</sub>. This can be done usingthepushbutton or the controller. The LED will start flashing after 3 seconds to indicate that the sensor is ready to start the teach-in process <sup>(\*)</sup>.
   Disconnect the teach-in input (ET) with -U<sub>B</sub>. The switching point SP has now been taught in <sup>(\*)</sup>.
- If no object is detected within the sensing range of the sensor, the sensor will start flashing at a faster rate. The switching point remains (\*) unchanged.

## Switching characteristics and display LED

= Object position

#### Safety Note

The use of this device in applications, where the safety of persons depends from the devices function, is not allowed!
