RL28-8-H-700-RT-Z/49/116

Background suppression sensor with terminal compartment

Features

- Ultra bright LEDs for power on and ٠ switching state
- Good alignability due to red transmis-٠ sion LED
- Programmable time function GAN, ٠ GAB, IAB as well as GAN-IAB and GAN-GAB as double function
- Not sensitive to ambient light, even ٠ with switched energy saving lamps
- Waterproof, protection degree IP67
- Protection class II •

Additional information

Mounting instructions:

There are two bore holes for mounting the sensor with M5 bolts. The base surface must be flat to avoid distorting the housing during mounting. It is advisable to secure the bolts with spring washers so that the sensor does not become misaligned. Outdoor installation:

The sensor must be protected against rain and splash-water, possibly must a cover be installed.

Adjustment:

Adjust the sensor on the background. After the connecting to the power supply the green LED illuminates. In case the yellow LEDs illuminate too, the detection range needs to be reduced with the detection range adjuster, until the yellow LEDs is switched off. If the object is moved into the detection range the yellow LEDs illuminates.

Driving inductive loads:

If the sensor are used to drive inductive loads, the following safety procedures must be carried out: For operating voltage of 10 ... 30 V DC: fit a protection diode, max. 200 mA
