#### **Features**

- 1 digital output, 2 digital inputs
- · Inputs and output Ex ia
- Installation in suitable enclosures in Zone 1 or Zone 21
- · Positive or negative logic selectable
- Simulation mode for service operations (forcing)
- Line fault detection (LFD)
- · Permanently self-monitoring
- · Output with watchdog
- Module can be exchanged under voltage (hot swap)

### **Function**

The digital output features 1 output with 2 feedback inputs.

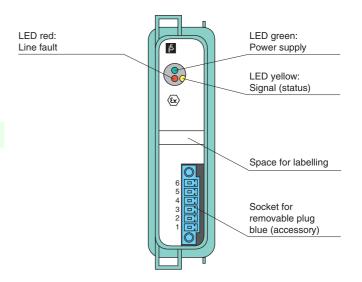

The device can be used to switch solenoids, sounders, or indicators (without line fault detection) in the field. Furthermore, the device accepts digital input signals of NAMUR sensors or mechanical contacts from the field.

Open and short-circuit line faults are detected.

The intrinsically safe inputs and the output are galvanically isolated from the bus and the power supply.

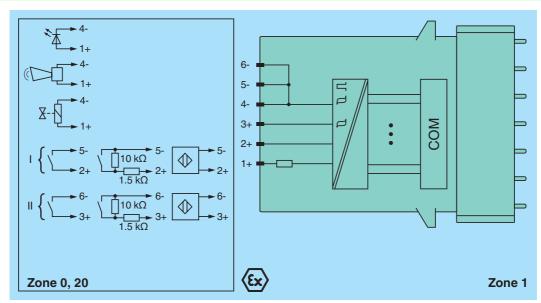

## **Assembly**

#### Front view

#### Connection

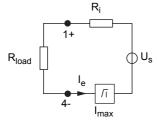

Supply		
Connection		backplane bus
Rated voltage	U <sub>n</sub>	12 V DC , only in connection with the power supplies FB92**
Power loss	o <sub>II</sub>	1 W
Power consumption		1.6 W
Internal bus		
Connection		backplane bus
Interface		manufacturer-specific bus to standard com unit
Input		mandiacturer-specific bus to standard com unit
Number of channels		2
Suitable sensors		mechanical contacts, NAMUR proximity switches, 2-wire initiators
Connection		channel II: 2+, 5-; channel II: 3+, 6-
		acc. to EN 60947-5-6 (NAMUR)
Rated values		1.2 2.1 mA/± 0.2 mA
Switching point/switching hysteresis		
Voltage		8.2 V
Internal resistor		1 kΩ
Line fault detection		can be switched on/off for each channel via configuration tool
Connection		mechanical switch with additional resistors (see connection diagram) , proximity switches without additional wiring
Short-circuit		< 360 Ω
Open-circuit		< 0.35 mA
Minimum pulse duration		1 ms
Output		
Number of channels		1
Suitable field devices		solenoid valves, acoustic alarms and LED indicators (without line fault detection)
Connection		channel I: 1+, 4-
Internal resistor	$R_i$	$220\Omega$
Open loop voltage	$U_s$	22 V
Current limit	I <sub>max</sub>	50 mA
Response time		20 ms (depending on bus cycle time)
Line fault detection		can be switched on/off for each channel via configuration tool, also when turned off (every 2.5 s the valve is
Short-circuit		turned on for 2 ms) $<$ 220 $\Omega$
Open-circuit		> 1.3 kΩ
Watchdog		within 0.5 s the device goes in safe state, e.g. after loss of communication
Indicators/settings		Thin to the united grown said state, eigh and located communication
LED indicator		LED green: supply LED red: output line fault LED yellow: status output
Coding		optional mechanical coding via front socket
Directive conformity		optional moontained country via none cooker

General information	1	
System information		The module has to be mounted in appropriate backplanes and housings (FB92**) in Zone 1, 2, 21, 22 or outside hazardous areas (gas or dust). Here, the corresponding EC-Type Examination Certificate has to be observed.
Supplementary inform	nation	EC-Type Examination Certificate, Statement of Conformity, Declaration of Conformity, Attestation of Conformity and instructions have to be observed where applicable. For information see www.pepperlfuchs.com.

# **Output data**

# Load calculation

$$\begin{split} &R_{load} = \text{Field loop resistance} \\ &U_e = U_s - R_i \times I_e \\ &I_e = U_s / (R_i + R_{load}) \end{split}$$
