- 1 digital output, 2 digital inputs
- Inputs and output Ex ia
- Installation in suitable enclosures in Zone 1 or Zone 21
- Positive or negative logic selectable
- · Simulation mode for service operations (forcing)
- Line fault detection (LFD)
- · Permanently self-monitoring
- · Output with watchdog
- Module can be exchanged under voltage (hot swap)

Function

The digital output features 1 output with 2 feedback inputs.

The device can be used to switch solenoids, sounders, or indicators (without line fault detection) in the field. Furthermore, the device accepts digital input signals of NAMUR sensors or mechanical contacts from the field.

Open and short-circuit line faults are detected.

The intrinsically safe inputs and the output are galvanically isolated from the bus and the power supply.

PEPPERL+FUCHS 1

Supply		
Connection		backplane bus
Rated voltage	Un	12 V DC, only in connection with the power supplies FB92**
Power loss		1.3 W
Power consumption		1.8 W
Internal bus		
Connection		backplane bus
Interface		manufacturer-specific bus to standard com unit
Input		
Number of channels		2
Suitable sensors		mechanical contacts, NAMUR proximity switches, 2-wire initiators
Connection		channel I: 2+, 5-; channel II: 3+, 6-
Bated values		acc. to EN 60947-5-6 (NAMUR)
Switching point/switching hysteresis		12 21 mA/+02 mA
Voltage		82V
Internal resistor		1 k0
Line fault detection		can be switched en/off for each channel via configuration tool
		can be switched on/on for each channel via configuration tool
Connection		mechanical switch with additional resistors (see connection diagram), proximity switches without additional wiring
Short airquit		~ 260 O
		< 300 52
Minimum pulse dure the		
winimum pulse duration		i ms
Output		
Number of channels		1
Suitable field devices		solenoid valves, acoustic alarms and LED indicators (without line fault detection)
Connection		channel I: 1+, 4-
Internal resistor	Ri	329 Ω
Open loop voltage	Us	25.3 V
Response time		20 ms (depending on bus cycle time)
Line fault detection		can be switched on/off for each channel via configuration tool , also when turned off (every 2.5 s the valve is
		turned on for 2 ms)
Short-circuit		< 25 Ω
Open-circuit		> 3.5 kΩ
Watchdog		within 0.5 s the device goes in safe state, e.g. after loss of communication
Indicators/settings		
LED indicator		LED green: supply
		LED red: output line fault
		LED vellow: status output

General information		
System information		The module has to be mounted in appropriate backplanes and housings (FB92**) in Zone 1, 2, 21, 22 or outside hazardous areas (gas or dust). Here, the corresponding EC-Type Examination Certificate has to be observed.
Supplementary information		EC-Type Examination Certificate, Statement of Conformity, Declaration of Conformity, Attestation of Conformity and instructions have to be observed where applicable. For information see www.pepperl-fuchs.com.
