

Model Number

GLD3-RT/95/147

Photoelectric slot sensor
with 4-pin, M8 x 1 connector

Features

- Push-button programmable
- Adjustable sensitivity
- Detection of paper and foil labels, including translucent varieties

Dimensions

Electrical connection

○ = Light on
● = Dark on

Pinout

Release date: 2011-09-19 10:41 Date of issue: 2011-09-19 911541_eng.xml

Technical data**General specifications**

Light source	LED
Light type	modulated visible red light
Approvals	CE
USA	cULus
Canada	cULus
Fork width	3 mm

Indicators/operating means

Function display	2 LEDs
------------------	--------

Electrical specifications

Operating voltage	U_B	10 ... 30 V DC
Ripple		10 %
No-load supply current	I_0	≤ 45 mA

Output

Switching type	light/dark on	
Signal output	1 NPN and 1 PNP Short circuit and overload protected Reverse polarity protected	
Switching current	max. 150 mA	
Voltage drop	U_d	≤ 1.5 V
Switching frequency	f	5 kHz
Response time		≤ 100 μs

Ambient conditions

Ambient temperature	-40 ... 70 °C (-40 ... 158 °F)
Storage temperature	-40 ... 70 °C (-40 ... 158 °F)

Mechanical specifications

Protection degree	IP66
Connection	M8 x 1 connector, 4-pin
Material	
Housing	Thermoplastic PPS
Optical face	zylex
Mass	53.86 g

Compliance with standards and directives

Standard conformity	
Product standard	EN 60947-5-2:2007 IEC 60947-5-2:2007

Approvals and certificates

UL approval	cULus
CCC approval	Products with a maximum operating voltage of ≤36 V do not bear a CCC marking because they do not require approval.

GLD3 series programming**Programming standard labels:**

1. Use the external alignment guides on the sensor housing to position the alignment dot over the label gap
2. Push the teach button labeled "Normal" for 1 second
3. The green Autoset LED will blink several times very fast during the teach process
If the teach is successful, the green Autoset LED will be ON.

If the teach is not successful, both the green Autoset LED and the red Output LED will blink 2 times very slow, then the green Autoset LED will be ON.

Programming translucent labels:

1. Use the external alignment guides on the sensor housing to position the alignment dot over the label gap
2. Push the teach button labeled "Translucent" for 1 second
3. The green Autoset LED will blink several times very fast during the teach process
If the teach is successful, the green Autoset LED will be ON.

If the teach is not successful, both the green Autoset LED and the red Output LED will blink 2 times very slow, then the green Autoset LED will be ON.

Light On/Dark On:

The output of the sensor can be inverted by pressing both the Normal button and Translucent simultaneously. The red Output LED and the sensors output will change states.
