SIEMENS

2-port seat valves PN25 with externally threaded connections

VVG55..

- Valve body bronze CC491K (Rg5)
- DN 15...25 (1/2 ...1 ")
- kvs 0.25...6.3 m3/h
- Stroke 5.5 mm
- Sets of ALG.. with threaded and ALS.. with weldable connections available from Siemens
- Suitable for type SQS.. actuators

Use

For use as a control, safety or isolating valve in district heating and heating systems. For closed hydraulic circuits.

Type summary

		external thread	k _{vs}	Sv
Туре	DN	[Inch]	[m ³ /h]	
VVG55.15-0.25		15 G %B 0.25 0.4 0.63 1.0 1.6 2.5	0.25	
VVG55.15-0.4			0.4	. 50
VVG55.15-0.63	45		0.63	> 50
VVG55.15-1	15		1.0	
VVG55.15-1.6			1.6	
VVG55.15-2.5			2.5	. 100
VVG55.20-4	20	G 1B	4.0	> 100
VVG55.25-6.3	25	G 1¼B	6.3	

DN = Nominal size

 k_{vs} = Nominal flow rate of cold water (5...30 °C) through the fully open valve (H₁₀₀) by a differential pressure of 100 kPa (1 bar)

 $S_v = Rangeability k_{vs} / k_{vr}$

k_{vr} = Smallest k_v value, at which the flow characteristic tolerances can still be maintained, by a differential pressure of 100 kPa (1 bar)

Accessories

Туре	Stock no.	Description
ALG2	ALG2	Set of 2 fittings with threaded connections for 2-port valves, consisting of
ALG2B	S55846-Z1	- 2 union nuts, 2 discs and 2 flat seals
		ALG3B are brass fittings, for media temperatures up to 100 °C.
ALS2	ALS2	Set of 2 fittings with weldable connections for 2-port valves, consisting of
		- 2 union nuts, 2 discs and 2 flat seals

Order

2/8

When ordering please give quantity, product name and type reference.

Example:

Туре	Stock No.	Description	Quantity	
VVG55.20-4	VVG55.20-4	Ventil	3	
ALG152B	S55846-Z100	Verschraubungs-Sets	2	

Delivery Valves, actuators and accessories are packed and supplied separately.

Spare parts, rev. no. See overview, page 8.

 $^{1)}$ Usable up to maximum medium temperature of 150 $^{\circ}\text{C},$ ALG142 pipe side with R $^{1}\!\!/_{2}\text{B}$

 Δp_{max} = Maximum permissible differential pressure across valve's control path, valid for the entire actuating range of the motorized valve.

 Maximum permissible differential pressure at which the motorized valve will close securely against the pressure (close off pressure).

 Δp_s

Actuator overview

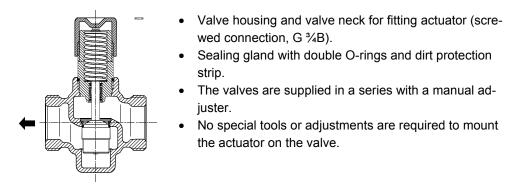

Туре	Operating voltage	Positionin	ıg signal	Positioning time	Spring return function		Data- sheet
SQS35.00				150 s			
SQS35.03	AC 230 V	3-Pu	nkt	35 s			
SQS35.50	AC 230 V	3-Fu	IIKL	150 s		8 s	
SQS35.53				35 s	yes		
SQS65.5		DC 010 V			yes	8 s	N4573
SQS65		DC 010 V	01000 Ω	35 s			
SQS65.2	AC 24 V	DC 210 V				_	
SQS85.00		3-Pu	nkt	150 s			
SQS85.03		J-FU	IINL	35 s			

A positioning force of 400 N is required to operate these valves. The D-series motorized actuators, types SQS.. are the only suitable actuators for this purpose

Note If VVG55.. valves are controlled by SQS65.. valve actuators, the valve characteristic jumper in the actuator must be set to "Linear".

Technical design / mechanical design

Valve cross-section

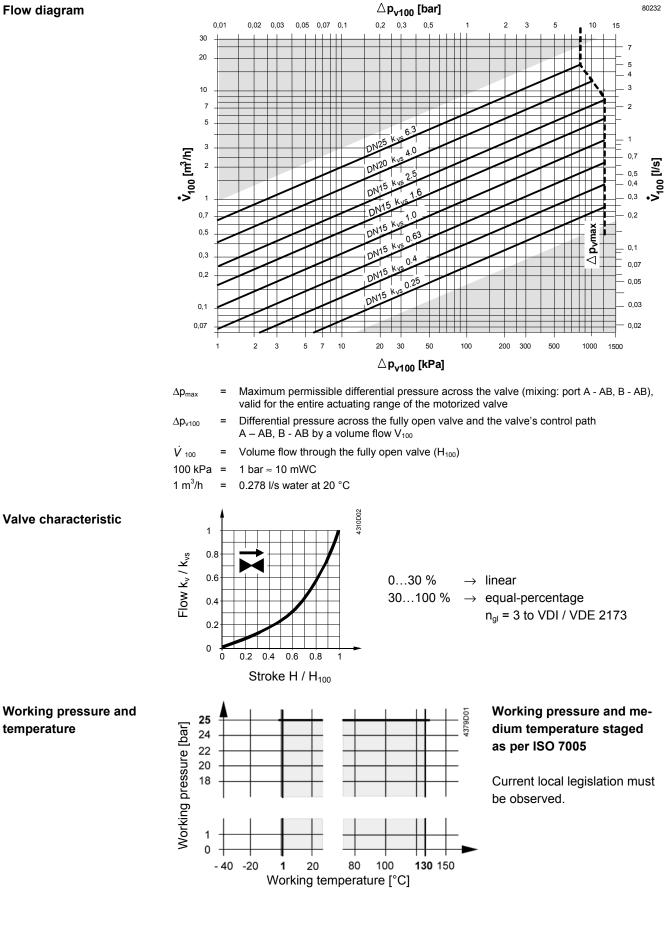

Manual adjustment The valve can be adjusted manually from 0...100 % by use of the plastic manual adjuster (which also acts as a protective cover during transport).

Rotation of manual adjuster

Clockwise	Valve stem retracts:	valve opens	= increasing flow
Counterclockwise	Valve stem extends:	valve closes	= decreasing flow

Flow diagram

temperature

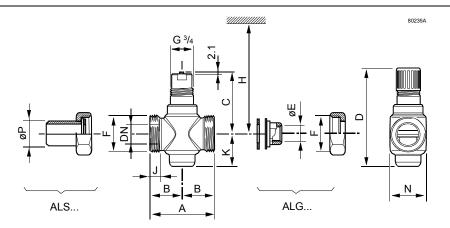

Engineering	The valves should preferably be installed in the return water, since in heating applica- tions, this is where the lower temperatures prevail. This will help extend the life of the spindle seal. Water quality specifications in accordance with VDI 2035.					
	To ensure reliable functioning of the valve, the installation of a strainer on the inlet side of the valve is required.					
Mounting	The valve and actuator can be assembled directly on site. No special tools or adjust- ments are required for this purpose. Mounting instructions are enclosed with the valve.					
Orientation						
Direction of flow	Before installation, check the flow indication \rightarrow on the valve.					
Commissioning 🖄	The valve can be commissioned with the actuator fitted in accordance with in- structions, or by fitting the manual adjuster.					
	Valve stem retracts: valve opens = increasing flow Valve stem extends: valve closes = decreasing flow					
Maintenance						
	VVG55 valves require no maintenance.					
Warning <u>^</u>	 When doing service work on the valve / actuator: Deactivate the pump and turn off the power supply Close the shutoff valves Fully reduce the pressure in the piping system and allow pipes to completely cool down If necessary, disconnect the electrical wires. Before putting the valve into operation again, make certain the actuator is correctly fitted. 					
Disposal	Before disposal the valve must be dismantled and separated into its various constituent materials. Legislation may demand special handling of certain components, or it may be sensible from a ecological point of view. Current local legislation must be observed.					
	The technical data given for these applications is valid only in conjunction with the Sie- mens actuators as detailed under "Equipment combinations", page 2. All terms of the warranty will be invalidated by the use of actuators from other manufact					

All terms of the warranty will be invalidated by the use of actuators from other manufacturers.
