SIEMENS

FDCI221, FDCIO221

Input module
Input/output module

CE

For the automatic addressable detector bus FDnet/C-NET

- **Input module FDCI221**
  - 1 monitored contact input for the message of technical states or for alarm actuation
- **Input/output module FDCIO221**
  - 1 control output with potential-free relay contacts for the control of fire doors, ventilation, air conditioning, elevator control installations
  - 1 monitored contact input for the message of technical states or for alarm actuation
- **Microprocessor-controlled signal evaluation**
- **Automatic address allocation during commissioning**
- **LED display of input and output status, localization**
- **Two-wire installation for all types of cable**
- **Power supply via FDnet/C-NET**
- **Communication via FDnet/C-NET (individual addressing)**
- **Applicable in dry, dusty and humid areas**
- **Different mounting possibilities**

Building Technologies

Characteristics

- **Environmental**
- – ecologically processing
- – recyclable materials
- – electronic und synthetic material simple separable
- **Characteristics**
- – transparent housing for good visibility of the indicators
- – protected electronics
- – integrated line separator
- – Automatic address allocation during commissioning
- – temporal status monitoring
- – power supply via FDnet/C-NET, auxiliary power supply only required if the output is configured as monitored
- – applicable in dry areas, use auxiliary housing for application in dust and humid/wet areas
Input module FDCI221

- **Function**
- – 1 input for potential-free contact
- – The input line is monitored for open line and short circuit (termination resistors).
- – The input can be configured via the fire control panel for status or alarm messages.
- – status indication by LED
- **Application**
- – For the connection of 1 potential-free make or break contact for the message of technical states (e.g. door or ventilation control) or for alarm actuation (e.g. sprinkler alarm).

potential-free switch   1 contact input
FDnet/C-NET

Input/output module FDCIO221

- **Function**
- – 1 input for potential-free contact
- – The input line is monitored for open line and short circuit (termination resistors).
- – The input can be configured via the fire control panel.
- – 1 output configured via jumper
  - – not monitored   -> 1 potential-free relay contact (22 VAC, 2 A or 30 VDC, 2 A)
  - – monitored   -> 1 relay contact (30 VDC, 2 A)
  - – status indication by LED
Building Technologies
CPS Fire Safety

● **Application**
– For the connection of 1 potential-free make or break contact for the message of technical states (e.g. door or ventilation control) or for alarm actuation (e.g. sprinkler alarm).
– For the decentralized control of fire doors, ventilation, air conditioning

potential-free switch   1 contact input

1 relay output 30 VAC/DC, 2 A or 22 VAC, 2A

FDnet/C-NET   fire control installation

Installation

– screw directly onto plane surface area
– mounting (series mounting) top hat rail TS35
– surface- or recess-mounted cable ducts
– in housing FDCH221 with cover, seal and screws for wet applications

Installation directly in switching cabinet / control panel

Installation in separately housing FDCH221

Installation in range with enclosed mounting feeds at top U rail TS35

For shielding cables use connection terminals DBZ1190-AB

Details for ordering

Type	Part no	Designation	Weight
FDCI221	S54312-F1-A1	Input module 1 input, incl. 2 resistors, 2 mounting feeds	0.056 kg
FDCIO221	S54312-F2-A1	Input/output module (1 input / 1 output), incl. 2 resistors and 2 mounting feeds	0.062 kg
FDCH221	S54312-F3-A1	Housing with cover, seal and screws	0.280 kg
–	A5Q00004478	Metal screwed cable gland M20 x 1.5	0.039 kg
–	A5Q00004479	Back nut M20	0.006 kg
DBZ1190-AB	BPZ:4942340001	Connection terminal 1.0… 2.5 mm² (3-pole)	0.002 kg
FDCM291	A5Q00003855	Mounting feeds (25 pcs.)	0.060 kg
