

VAI60..

VBI60..L

VBI60..T

ACVATIX™

Open/close ball valves 2-port VAI60.. and changeover ball valves VBI60..L 3-port, PN40 VBI60..T

with internally threaded connections

- Brass UNS C35330 (DZR) ball valve body
- DN 15...50
- k_{vs} 5...96 m³/h
- Internally threaded connections Rp as per ISO 7-1
- Angle of rotation 90°
- For use with rotary actuators GQD..9A, GMA..9E with spring-return and GSD..9A, GLB..9E without spring return

Use

For use in heating, ventilating and air conditioning plants as open/close or changeover ball valve.

For closed circuits (avoid cavitation, see page 5).

Type summary

Open/close ball valves 2-port	Type		DN	k _{vs} [m ³ /h]

Δp_{max} = maximum permissible differential pressure across ball valve's control path, valid for the entire actuating range of the motorized ball valve; for low noise operation, we recommend a maximum permissible differential pressure of 200 kPa

Δp_s = maximum permissible differential pressure at which the motorized ball valve will close securely against the pressure (close off pressure)

Rotary actuators for ball valves (overview)

Type / Stock no.	Actuator type	Operating voltage	Positioning		Spring return		Data Sheet
			signal	time	function	time	
GSD141.9A	Electro-motoric	AC/DC 24 V	Open/Close ¹⁾	30 s			N4655

²⁾ open/close

Ordering

When ordering please give material, article type, purchase order text and quantity.

Example:

Material	Article Type	Purchase Order (PO) text	Quantity
VAI60.25-22	VAI60.25-22	Open/Close Ball valve inside threaded, 2-Port	2
GLB131.9E	GLB131.9E	Actuator for Ball valve, NSR	2

Spare parts, Rev. no.

See overview, page 11.

Delivery

Ball valves and rotary actuators are supplied in separate packaging and not assembled prior to delivery.

Applications with auxiliary functions

If a ball valve application requires a rotary actuator with auxiliary functions (for example switch or potentiometer), a standard actuator with a corresponding function can be used. In this case, a mounting set ASK77.. is required **in addition** to the rotary actuator.

For assembly please consult mounting instructions accordingly.

Rotary actuators	Option	Mounting set (order text)
GMA..1E (with spring-return)	Potentiometer, switches	ASK77.2 Accessory Kit BV for GMAxx1.9E
GLB..1E (without spring-return)	Potentiometer, switches	ASK77.3 Accessory Kit BV for GLBxx1.9E
GQD..1A (with spring-return)	Switches	ASK77.4 Accessory Kit for BV GQDxx1.9A
GSD..1A (without spring-return)	Switches	ASK77.4 Accessory Kit for BV GQDxx1.9A

Accessories

For thermal insulation, separate insulation covers are available.

For open/close ball valves 2-port		For changeover ball valves 3-port

Technical design

Parts

Sizing

Flow diagram

----- Δp_{max} for VAI60.. and VBI60.. see table equipment combinations for details

Δp_{max} = maximum permissible differential pressure across the ball valve, valid for the entire actuating range of the motorized ball valve; for low noise operation, we recommend a maximum permissible differential pressure of 200 kPa

- Δp_{V100} = differential pressure across the fully open ball valve and the ball valve's control path at a volumetric flow V_{100}
- \dot{V}_{100} = volumetric flow through the fully open ball valve
- 100 kPa = 1 bar \approx 10 mWC
- 1 m³/h = 0.278 l/s water at 20 °C

Cavitation

Cavitation accelerates wear on the ball and seat, and also results in undesirable noise. Cavitation can be avoided by not exceeding the differential pressure shown in the flow diagram on page 4, and by adhering to the static pressures shown below.

- Δp_{max} = differential pressure with ball valve almost closed at which cavitation can largely be avoided
- p_1 = static pressure at ball valve inlet
- p_3 = static pressure at ball valve outlet
- M = pump
- ϑ = water temperature

High temperature
hot water example:

Pressure p_1 at ball valve inlet: 500 kPa (5 bar)
Water temperature: 120 °C

From the diagram above, it will be seen that with the ball valve almost closed, the maximum permissible differential pressure Δp_{max} is 200 kPa (2 bar).

Note on chilled water

To avoid cavitation in chilled water circuits, ensure sufficient counter-pressure at the ball valve's outlet, e.g. with an additional throttling ball valve downstream from the ball valve. Select the maximum differential pressure across the ball valve according to the 80 °C curve in the flow diagram above.

Operating pressure and temperature
Fluids

Operating pressure and medium temperature as per ISO 7005

Current local legislation must be observed.

Notes

Engineering

Ensure cavitation-free flow (refer to page 5).

Always use a strainer upstream of the ball valve to increase the ball valve's functional safety.

Mounting

Ball valve and rotary actuator can easily be assembled on site. Neither special tools nor adjustments are required.

The ball valve VAI60.., VBI60.. is supplied with Mounting Instructions M4213 (74 319 0883 0).

Orientation

VAI60..

**VBI60..L
VBI60..T**

Direction of flow

When mounting, pay attention to the ball valve's flow direction symbol.

Ball valve	Laser mark	Delivery position	Turned 90° (Clockwise)
VAI60.. Open/close ball valve 2-port		 <p>A – AB = 100 %</p>	 <p>A – AB = 0 %</p>
VBI60..L Changeover ball valve 3-port (L-Type drill-hole)		 <p>B – AB (AB – B) = 100 %</p>	 <p>A – B (B – A) = 100 %</p>
VBI60..T Changeover ball valves 3-port (T-Type drill-hole)		 <p>A – AB = 100 % B – AB = 0 %</p>	 <p>A – AB = 0 % B – AB = 100 %</p>

Commissioning

Commission the ball valve only if the rotary actuator has been mounted correctly.

Maintenance

VAI60.. and VBI60.. ball valves are maintenance-free.

Warning

When doing service work on the ball valve / rotary actuator:

- Deactivate the pump and turn off the power supply
- Close the shutoff ball valves
- Fully reduce the pressure in the piping system and allow pipes to completely cool down

If necessary, disconnect the electrical wires.

Before putting the ball valve into operation again, make sure the rotary actuator is correctly fitted.

Disposal

Before disposal, the ball valve must be dismantled and separated into its various constituent materials.

Legislation may demand special handling of certain components, or it may be sensible from an ecological point of view.

Current local legislation must be observed.

Warranty

The technical data given for applications is valid only in conjunction with the Siemens rotary actuators listed under "Equipment combinations", page 2.

All terms of the warranty will be invalidated if rotary actuators of other manufacture are used.
