

SEL52-H1A0-K02

Motor feedback systems rotary HIPERFACE®

Model Name > SEL52-H1A0-K02

Part No. > 1037372

At a glance

- · Motor feedback systems for the basic performance range
- 16 sine/cosine periods per revolution
- Absolute position with a resolution of 512 increments per revolution and 4,096 revolutions with the multiturn system
- · Programming of the position value
- · Electronic type label
- HIPERFACE® interface
- Various shaft variants: Hollow and tapered shaft and as shoulder clamping
- · Conforms to RoHs

Your benefits

- · The small dimension allows manufacturers of low-power and minimal-power motors to considerably reduce the size of their motors
- The SEK/SEL52 motor feedback systems are excellently suited for use under rough environmental conditions
- The capacitive principle of measurement with holistic scanning allows for high axial and radial tolerances
- Due to the resolver-compatible mechanical components of the SEK/SEL52 motor feedback systems the encoders can be mounted immediately

Performance

Number of sine/cosine periods per revolution: 16

Number of the absolute ascertainable revolutions: 4,096 (Multiturn) Total number of steps: 2,097,152

Measuring step: 20 angular seconds (at interpolation of the sine/cosine signals with e.g. 12

Bit)

± 288 angular seconds (Error limits for evaluating sine/cosine period) Integral non-linearity typ.:

typical values at nominal position ± 0,1 mm and + 20 °C

Differential non-linearity: ± 72 angular seconds (Non-linearity within a sine/cosine period)

typical values at nominal position ± 0,1 mm and + 20 °C

6,000 /min, up to which the absolute position can be reliably produced Operating speed:

1,792 B (EEPROM 2048) Available memory area:

512 Via RS485 Maximum number of steps per revolution:

¹⁾ If applying the electronic type label, in connection with numeric controllers, attention should be paid to Patent EP 425 912 B 2, application of the elektronic type label in connection with speed regulation ist exempt.

Mechanical data

Shaft diameter: 12.7 mm

Dimensions: See dimensional drawing Mass:

0.04 kg (without cover)

0.07 kg (with cover part no. 2048234)

Moment of inertia of the rotor: 6 gcm² 10,000 /min Operating speed: 500,000 rad/s² Angular acceleration:

Connection type: Connector, 8-pin, axial

Permissible axial shaft movement: ± 0.5 mm

Shaft version: Blind hollow shaft

Permissible radial shaft movement: ± 0.15 mm

Electrical data

Electrical interface: **HIPERFACE** 7 V DC ... 12 V DC Operating voltage range/supply Voltage:

Recommended supply voltage: 8 V DC < 50 mA ¹⁾ Operating current:

1) Without load

Interfaces

Type of code for the absolute value: Binary

Code sequence: Increasing, for clockwise shaft rotation, looking in direction "A" (see

dimensional drawing)

Process data channel SIN, REFSIN, COS, REFCOS: analog, differential Interface signals:

parameter channel RS 485: digital

Ambient data

-20 °C ... 115 °C Working temperature range:

-50 °C ... 125 °C, without package Storage temperature range: Relative humidity/Condensation: 90 %, Condensation not permitted

Resistance to shocks: 100 g, 10 ms (according to EN 60068-2-27)

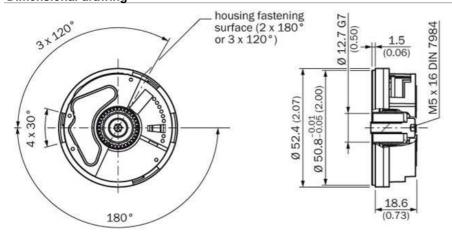

50 g, 10 Hz ... 2,000 Hz (according to EN 60068-2-6) Resistance to vibration: According to EN 61000-6-2 and EN 61000-6-3 1) EMC:

IP 40. according to IEC 60529, built-on version, with mating connector Enclosure rating:

inserted and closed cover

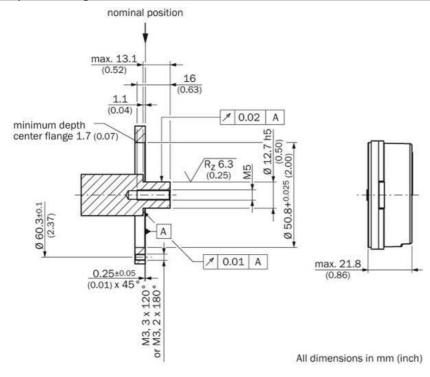

¹⁾ The EMC according to the standards quoted is achieved when the motor feedback system is mounted in an electrically conductive housing, which is connected to the central earthing point of the motor controller via a cable screen and by using the cover (part no. 2048232). Users must perform their own tests when other screen designs are used.
