

UFN3-70P415

# Fork sensors UF, UFnext

Model Name > UFN3-70P415 Part No. > 6049679

## At a glance

- Detection of transparent, opaque or printed labels
- · Unaffected by metallic foils and labels
- Fast response time of 250 μs
- Simple and accurate adjustment via "+"/"-"-buttons or teach-in
- · Rugged, IP 65 aluminum housing

#### Your benefits

- Reliable label detection, regardless if labels are transparent, opaque or have a printed design, ensuring greater flexibility with one sensor
- · Fast response times enable precise detection even at high web speeds
- The aluminum housing meets all requirements for use in harsh industrial conditions
- Setting the switching threshold using the +/- push buttons or teach-in
- Ultrasonic technology prevents false detection, which may be caused by ambient light or shiny surfaces

**Features** 

Functional principle: Ultrasonic detection principle

Fork width: 3 mm
Fork depth: 69 mm
Label detection: ✓

Adjustment: Dynamic teach-in Static teach-in

Output function: Light/darkswitching, selectable via button

Housing design (light emission): Fork shaped

Minimum detectable object (MDO): Size of labels: 2 mm, Gap between labels: 2 mm

Dimensions (W x H x D): 18 mm x 47.5 mm x 92.5 mm

1) Depends on the label thickness

Mechanics/electronics

Residual ripple  $\frac{1}{1}$ : < 10 % Power consumption  $\frac{2}{1}$ : 40 mA Switching frequency  $\frac{3}{1}$ : 1.5 kHz Response time  $\frac{4}{1}$ : 250 µs

Output type: PNP: HIGH = VS- ≤ 2 V / LOW approx. 0 V

Switching mode: PNP

Output current Imax. 5): 100 mA Input, teach-in (ET):

Run: U < 2 V Teach: U > 7 V ... < U

Initialization time: Protection class 6): 100 ms Ш

Output Q short-circuit protected Interference suppression Circuit protection:

Enclosure rating: **IP 65** 95 q Weight:

Aluminum, Metal Housing material: 10 V DC ... 30 V DC <sup>7)</sup> Supply voltage:

Fieldbus interface:

### **Ambient data**

According to EN 60068-2-27 EN 60947-5-2 Shock load:

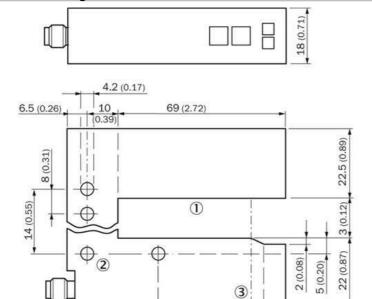

EMC: +5 °C ... +55 °C <sup>2)</sup> Ambient temperature operation: -20 °C ... +70 °C Ambient storage temperature:

It may cause radio interference if used in residential areas. <sup>2)</sup> Do not bend below 0 °C

<sup>1)</sup> May not exceed or fall short of V<sub>S</sub> tolerances 2) Without load 3) With light/dark ratio 1:1, typical, dependent on material and speed 4) Signal transit time with 5) Cresistive load Output current minimal 0.03 mA Reference voltage DC 50 V Limit values, reverse-polarity protected, operation in short-circuit protected network: max. 8 A

<sup>1)</sup> The UFN complies with the Radio Safety Requirements (EMC) for the indus-trial sector (Radio Safety Class A).

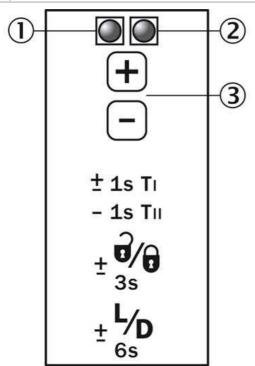

# **Dimensional drawing**

- |1| Fork opening: fork width 3 mm, forks depth 69 mm
- |2| Mounting hole, Ø 4.2 mm
- |3| Detection axis

Adjustments

(0.28)

- |1| Function signal indicator (yellow), switching output
- |2| Function indicator (red)
- |3| "+"/"-" buttons and function button

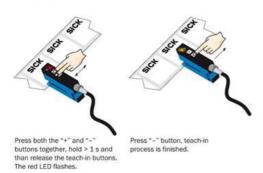

7 (0.28)

(0.43)

41 (1.61)

 Position label or substrate in the active area of the fork sensor

2. Move multiple labels through the fork sensor

#### Notes

Switching threshold adaptation:

Only, the first teach-in procedure after switching on is permanently stored. Teach-in can be repeated cyclically. Switching output also during teach-in active.

Once teach-in process is complete, the switching threshold can be adjusted at any time using the "+" or "-" button. To make minor adjustments, press the "+" or "-" button once.

To configure settings quickly, keep the "+" or "-" button pressed for longer.

Press both the "+" and "-" buttons together (3 seconds) to lock the device and prevent unintentional actuation.

Press both the "+" and "-" buttons together (6 seconds) to define the switching function (light/dark switching). Standard setting: Q = light switching.

Teach-in (static): Setting the switching threshold without movements of label, cf. operating instruction.
