

Diaphragm pressure gauges with electrical alarm contacts in stainless steel case

with or without dampening

with magnetic snap-action contacts
or inductive alarm contacts

Nominal sizes ND 100, 160

Connection position bottom, radial

Description

The design principle and material selection of the diaphragm pressure gauges allow them to meet the stringent demands occurring above all in industrial service.

Special corrosion resistant materials are used for service with chemically aggressive media.

Open process connections ensure that the gauges are easy to clean with highly viscous or crystallizing process media, thus guaranteeing process reliability.

As a result of the high actuating forces, pressure gauges with diaphragms are particularly suitable for connection of electric alarm contacts. Electric alarm contacts open and close circuits in response to the position of the pressure gauge pointer.

Magnetic snap-action electric alarm contacts are used in adverse operating conditions. The high contact pressure and the selection of various contact materials result in reliable and cost-effective solutions, above all when high currents have to be switched. Signal output does however take place slightly in advance of or lagging slightly behind the motion of the actual value pointer.

If the electrical switching capacities of the alarm contacts are exceeded or not reached (see DE 1231), a relay (DE 1230) is to be used to provide an appropriate current rating.

Inductive electric alarm contacts have an almost unlimited service life, as the signal is switched without physical contact. Closing or opening takes place without any feedback effect on the measuring system, precluding any signal lead or lag. A corresponding control unit is always required for operation. Units with inductive contacts may be operated in areas with potentially explosive atmospheres, assuming compliance with existing specifications.

Features

- o Limit value signalling by magnetic snap-action or inductive contacts
- o With SVA-amplifier suitable for SPS control units
- o Up to four alarm contacts possible
- o Can be used under Ex-conditions with inductive alarm contacts
- o Liquid dampening provides vibration-free display
- o Up to 10-fold overload capacity
- o Protection class IP 54

Ranges

0 ... 25 mbar to 0 ... 40 bar

Applications

Mechanical engineering,
plant and apparatus construction,
Building services

Model : P1651, P1653, P1661, P1663

Technical data

Model	P1651	P1653	P1661	P1663	Options
Nominal size	100		160		
Symbol					
Contact type	Magnetic snap action	Inductive	Magnetic snap action	Inductive	
Number of contacts *	1 to 4 depending on measuring range	1 to 3 depending on measuring range	1 to 4 depending on measuring range	1 to 3 depending on measuring range	
Electrical connection	Cable connector right hand side 6 screw terminals + PE, cross section of the conducting wire 2.5 mm ² Screw type conduit fitting M20x1.5, outgoing downwards				back (without pressure relief opening)
Accuracy class	Class 1.6 according EN 837-3 Class 2.5 with liquid filling and ranges from 0...25 to 0...100 mbar				
Ranges	0...25 mbar to 0...250 mbar : flange Ø 160 mm 0...0.4 bar to 0...40 bar : flange Ø 100 mm negative or positive or negative and positive gauge pressure				
Application	Constant load : up to full scale value Alternating load : 0.9 x full scale value				
Overload protection	≤ 0.4 bar : 5 x full scale value > 0.4 bar to ≤ 2.5 bar : 3 x full scale value > 2.5 bar : 5 x full scale value, max. 40 bar				overloadable: 10x full scale value, max. 40 bar. vacuum proof to -1 bar
Case	Stainless steel				
Upper flange	Steel, black				
Connection with lower flange	Steel, black				
- Position	Bottom, radial				
- Thread	G1/2 B, SW 22				other threads or open flanges on request
Bezel	Stainless steel, bayonet ring				
Window	Plexiglass				Laminated safety glass
Dial	Aluminium, white, scale and lettering black				Dual scale
Pointer	Aluminium, black				
Movement	copper-alloy, bearing parts German silver				
Elastic measuring element	≤ 2.5 bar : stainless steel 1.4571 > 2.5 bar : stainless steel (Duratherm 600)				
Seal to pressure chamber and filled internal chamber	NBR (Perbunan)				FPM (Seals made of Viton [®]) ¹⁾ or PTFE
Temperatures	- medium Tmin. -20°C, Tmax. 100°C - ambient Tmin. -20°C, Tmax. 60°C				
Temperature drift	0.5% / 10 K deviation of normal temperature +20°C				
Protection EN 60 529/ IEC 259	IP 54				
Components in contact with medium	see process connection with lower flange and elastic measuring element				Special materials on request
Throttle					ø0.4 ; ø0.8

1) Viton[®] fluoroelastomer, a product of DuPont Dow Elastomers

* Max. number of contacts

Measuring range	Magnetic snap-action contact	Inductive contact
25 mbar	2	2
40 mbar to 160 mbar	3	3
above 250 mbar	4	3

See data sheet DE 1231 for electrical data.
See data sheet DE 1230 for electrical accessories.

160								136	

Other dimensions as standard version

1) Suitable for mounting to flange acc. to DIN, sealing face form D to DIN 2526.

2) The listed weights are additional mass, which must be added to the weight of the standard version (connection G 1/2 B acc. to DIN 16 288).
